# Temporary Fiber Drop Marker

## Features

- Quick, easy, light weight
- 2.5" in diameter
- Highly visible fluorescent acrylic material
- Protects expensive cable drops prior to trenching
- Reusable

When new communications services are installed at a location often a temporary cable is placed on the ground and left until such time as a crew can come and permanently bury the cable in the ground.

This leaves the cable vulnerable from damage caused by vehicle traffic, mowers and people tripping on the cable.

U-TECK has developed a temporary solution to this problem.

Our new "Temporary Fiber Drop Markers" are placed over the cable and holds it to the ground firmly.

Our markers are made from a Highly Visible Fluorescent Acrylic material that enhances the visibility of the cable and helps reduce damage that might occur. Each marker is 2.5" in diameter.

Simply insert the staple pin onto the marker disc with the message side up, straddle the cable with the marker, and push firmly into the ground. The arrow indicator should align with the direction of the cable. Space markers adequately for best results.

U-TECK's Temporary Fiber Drop Markers are meant to be reused.
