

DIELECTRIC UMBRELLA

U-TECK's line of dielectrically safe fiberglass umbrellas provides a variety of options for protection from the elements, rain or shine.

Features:

- High-visibility, heavy duty yellow umbrella with top air vents
- Fiberglass extension pole and skeleton
- Comes complete with adjustable tripod
- Offered with straight pole or with our exclusive Sturdy-Tilt locking hinge

Our exclusive Sturdy-Tilt option with locking hinge allows the user to adjust the angle of cover for shade from damaging ultraviolet rays or from driving rain. We've also moved the tilt higher up the pole, to off-set the weight, making the umbrella more sturdy

The optional window in the covering of the umbrella incorporates a piece of transparent plastic, which allows the worker to see obstacles or hazards that may be above the umbrella.

Each umbrella is constructed of materials that make it durable enough for use in high winds or harsh weather yet light enough to be used on mowers, tractors, etc.

For safety, our umbrellas have a hardened fiberglass composite extension pole so that no metal-to-metal contact can be made. The Dielectric Umbrella comes standard with an adjustable tripod stand with three anchor stakes. Carrying bags for handling or storage are also available.
