U-TECK

FIBER OPTIC SPLICING WORKSTATION

U-TECK is proud to offer the next generation fiber splicing workstation to support fiber splicing at the splice or optical network terminal (ONT). The NEW! Fiber Optic Splicing Workstation has a larger work surface, but offers the ability to fit in most work sites. It can be used as a freestanding workbench or in narrow manhole environments, inside tents, central office work, and light enough for aerial work in a bucket or attached directly to the cable support strand by removing the work surface from the stand.

Features:

- Portable workbench
- Large work surface
- Compact fold-up
- Built in slots & holes for tools
- Heavy duty steel legs
- Quick-attach standoffs for hanging
- Adjustable height
- Cable management attachment included

The heavy duty, steel legs lock firmly to the work surface at heights of 32" and 40" tall, keeping your table at a comfortable working level. Our unique Cable Management Bracket fits securely on either side of the workbench, allowing jacketed strands to stay put and separated until you need them.

Separate the work surface from the stand and quickly attach the two unique stand-off props with adjustable webbing into the 4 accessory slots and you can take your work table to new heights, giving you a secure and level work surface when hanging it over terminal casings inside data rooms, closets, and outdoors against a wall for wall-mounted ONT's or NID's.

Ordering Information

Description:	Product #:
Workstation with floor stand only	55700
Workstation with floor stand + cable management bracket, and stand-offs	55701
Workstation with floor stand + cable management bracket	55706

Attach the Aerial Strand Cables into the 4 accessory slots and your table is right where you need it for work at the cable support strand while working from an aerial bucket truck.

The Workstation surface area is approximately 35-1/2" x 22-1/2", with an inside recessed area of 22" x 18" and a weight capacity of 100 lbs. Slots and holes are molded into the table to conveniently hold tools, parts, splicing sleeves and other splicing equipment. This recessed area prevents small pieces from rolling off. The table folds up neatly for quick and easy transport and storage. If you use the Workstation with the table top, floor stand and cable management bracket, it will weigh in at 17.63 lbs.

Hanging the Workstation using just table top, stand-offs, and the cable management bracket, the total weight is a mere 10.27 lbs!

No matter where your fiber splicing duties take you, you'll want to have this lightweight Workstation available at all times. Durable, portable and stable, this will become a standard in your splicing environment.

SPLICER SEAT

U-TECK has combined a longtime, craft-accepted design with a new polyethylene material to produce a rugged splicer seat that can be warranted for up to five years.

With the U-TECK Splicer Seat, there is never a need for water treatment because it is waterproof.
No need for painting, either; the color is molded into the seat. And no worries about splintering. It is ouchless! This seat can be drilled to attach other equipment, such as splicing machines.

Features:

- Extremely rugged
- Convenient tool slot
- Traditional design
- Large sitting area
- Polyethylene material
- Textured surface
- Five-year warranty
- Available in grey & safety orange

U-TECK has even included a handy tool slot in the top to hold your tools, connectors, or other small items when you need them close at hand.

Conventional splicing machines can be attached to the Splicer Seat. The unique design of the seat allows it to be used at three different positions for varied heights. The Splicer Seat also makes an excellent footstool. With this seat, you will never need to purchase a replacement again.

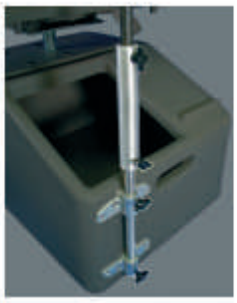
Splicer Seat Accessories

MS2 Splicer Adapter

Fits on your MS2 splicing tool to easily attach and remove it from the Splicer Seat.

Seat Cushion

Thickly padded cushion in a weather-resistant cover. Comes complete with three large pockets for tools and materials.



Universal Splicing Head Adapter

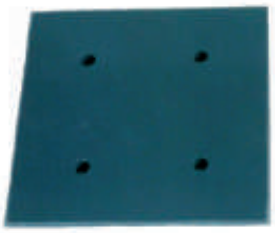
Used to temporarily attach either a 710 or MS2 splicing machine to the Ergonomic Seat or the "P" Splicer Seat. Can be mounted in several locations as desired by individual splicers.

Splicing Arm Base

Fits under your Splicer Seat to attach your modular splicing tool when you do not want to attach it directly to the Seat.

710 Splice Adapter

Fits on your 710 modular splicing tool to easily attach and remove it from the Splicer Seat.



Tool Base Adapter

Assists you when permanently attaching your 710 splicing tool to the Splicer Seat.

Splicing Mat

3 ft. x 4 ft. rugged, washable, reusable pad that covers the work area. Keep your jelly-filled cable out of the dirt, and you and your tools out of the mud and weeds.

Retro Fit Kit

Allows the upgrade from the Splicer Seat to the Ergonomic Seat. Includes the splicer seat adapter, the Ergonomic Seat, and even the drill bits to drill the holes.

WORKCENTER ERGO SEAT

U-TECK has taken a field-proven and craft-accepted design—the "P" Seat—and incorporated it into The WorkCenter, the newly designed Ergo Splicer Seat workstation. The upper portion of this seat removes easily, making setup possible even in tight, hard-to-maneuver spaces

Features:

- Anti-Skid Bottom
- Convenient Tool Slot
- Swivel 360 Degrees
- Seat Back and Cushion Area removes and Folds up
- Weather Resistant
- All Hardware is Stainless Steel
- Breaks down For Tight Places & Easy Storage.
- Seat Can Be Used With or Without Back
- Base is available in Grey & High-Vis Safety Orange

The WorkCenter as a complete unit is available to be ordered, or you can purchase a simple kit which will retro fit the thousands of existing Splicer Seats that are being used by companies today. This will result in a tremendous savings for your individual budget.

The multi-faceted unit is also the toolbox personnel are accustomed to, which lets them keep their tools and materials convenient during an entire operation.

U-TECK has also designed a new Universal Splicing Head Adapter for mounting splicing heads to the seat base. This adapter will accept virtually any splicing machine. It may be mounted in different positions to accommodate the preference of the individual splicer. This makes the WorkCenter a complete workstation.

FIBER OPTIC PROTECTOR SLEEVE

U-TECK's Fiber Optic Protector Sleeves were developed to protect and strengthen fusion splices on fiber cables. The construction of the three separate protective and strengthening elements of the sleeve are distinctive in the function that each provides.

The inner stainless steel pin keeps the sleeve rigid and stable. The pins are vibratory tumbled with a special medium. This eliminates the possibilty of fiber scarring or material penetration, preventing damage to sensitive glass fibers.

The outer tube is manufactured of a heat shrinking polyolefin. This encloses the inner tube and the encapsulated fiber splice, providing double protection and ensuring that moisture and air are eliminated from the fiber splice.

U-TECK's Fiber Optic Protector Sleeves are available in a standard length of 2 3/8" and are adaptable with all standard organizers. However, various lengths are available upon request.

MAGIC WRAP

Magic Wrap® is an Emergency Repair Kit on a Roll. A poly-butyl rubber compound, Magic Wrap® is activated when stretched. This activation causes Magic Wrap® to adhere to itself. Thus, any object which can be spiral wrapped can be repaired or sealed

Magic Wrap® is ideal for use on dirty or wet surfaces. Because there is no adhesive, there is no reason that dirt or moisture will cause it to fail. Repairs can even be done underwater!

Magic Wrap® is ideal for the following repairs:

Automotive – will repair engine hoses, even fuel lines (to repair fuel lines, the white liner must be used first, then the Magic Wrap® over top of the white liner. The white liner prevents any reaction between the fuel and the Magic Wrap®.)

Electrical – UL listed

Plumbing – works on copper and PVC pipes under pressure – no need to turn off the source of water

Sealing, weatherproofing, splicing, covering, holding/bundling, joining and repair applications

General Household repairs

Sporting goods – grips for hockey sticks, tennis rackets, fishing rods

FIBER SPLICE CASE STAND

The *Fiber Splice Case Stand* is a portable support stand designed to hold fiber closures when performing splicing duties. It works great in conjunction with our *Fiber Optic Splicing Workstation*! TECK's newly improved *Fiber Splice Case Stand* now allows a splicing technician to securely hold th splice case in both the horizontal or vertical position while performing splicing functions or maintenance, a helpful feature when space is limited! It is strong, lightweight and able to fit your real-world splicing environments. Simple to use, it sets up quickly with your fiber case held secur to the stand platform with self gripping, velcro straps.

Features:

- Secures splice cases for fiber work
- Portable and lightweight construction
- Locking safety hinge pin platform and knob-style tension locking legs
- Can be used Horizontally or Vertically
- Works with most splice case sizes
- Load capacity 132 lbs.
- Maximum tripod height is 63" with a minimum of 40"

The *Fiber Splice Case Stand* is built for years of repeated use. The support beam is constructed from lightweight aluminum that secures the polymer platform and a heavy-duty hinge with locking safety pin for maximum strength/security, with a sturdy cable guide. The tripod is made of reinforced metal tubing and the legs feature knob-style tension locking.

Create your ideal work environment with the *Fiber Optic Splicing Workstation* and the *Fiber Slice Case Stand*!

U-TECK™
Your Safety... Our Solutions.
159 Rock Hill Rd, Fayetteville, North Carolina 28312
(800) 542-7011 / UTECK.COM

Ordering Information

Description:	Product #:
FIBER SPLICE CASE STAND	55712

The footprint of the *Heavy-Duty Tripod* can also be adjusted depending on the space you have to work.

The *Splice Case Support Rest* and the *Splice Case Support Plate* are both adjustable depending on the size and type of closure to be secured.

The *Support Plate* comes with 2 sizes of *Velcro Strapping* to secure the splice case to the *Stand*.

When used in conjunction with U-TECK's *Fiber Splicing Workstation*, splicing functions are performed in an organized and comfortable environment.

To assemble, simply slide the *Support Rest* onto the *Support Bar* and tighten the *Set Screw* into the desired position.

To change the horizontal or vertical direction of the *Splice Support Bar*, insert the *Support Bar Hinge Pin* for horizontal or remove the Hinge Pin for vertical.

LADDER SPLICING PLATFORM

U-TECK's new Ladder Splicing Platform solves the problem of Splicing while on a ladder!

Transporting and assembling a makeshift splicing platform while trying to maneuver up extension ladders was, in the past, a difficult and UNSAFE task.

Our ALL NEW Splicing Platform attaches directly to the ladder for a secure, stable work area that measures 13.5"x9.5". The all NEW Splicing Platform is strong (but lightweight) and can be adjusted for splicing on either the left or the right side to accommodate dexterity as well as any interference that may occur on either side while splicing. The LSP is incredibly versatile- it works with EVERY ladder we have been able to find! Secure your splicing machine with the Captive Knob (included) and splice comfortably - at NIOSH recommended 75°- while working atop ladders!

We've also included a slot to accept our 5-pocket tool pouch to keep an assortment of tools conveniently at hand.

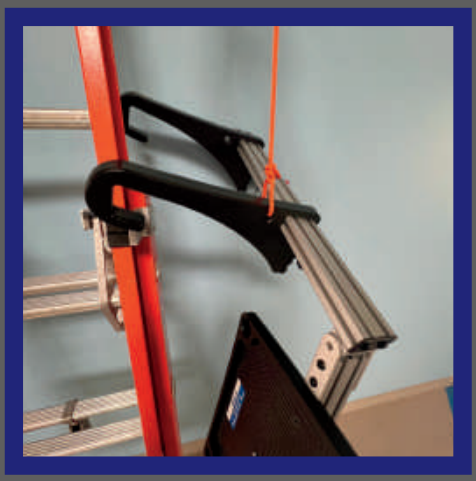
INSTRUCTIONS FOR USE

1



Attach handline to platform using pre-approved handlining procedures.

2

Once handlined up, hang device onto rung at desired location.

3

Once secure, pull base to secure on rung underneath.

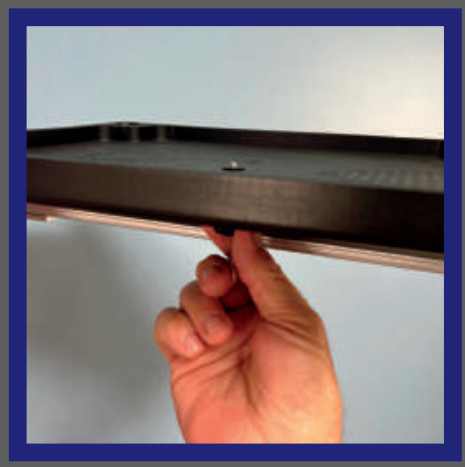
4

Secure in place with Red adjusting clamps

5

Adjust platform to desired working position

6



Secure Splicing Machine to platform using captive knob provided.

FIBER-GRIP SPLICING CLAMP

U-TECK's FIBER-GRIP Splicing Clamp was designed specifically for our Fiber Splicing Workstation.

The FIBER-GRIP will securely hold and manage loose fiber, ribbon, tubes, or cables up to .5" diameter while you are splicing.

Quickly attaches to the Workstation at one of two locations simply with a toggle clamp.

RADIUS BEND TOOL

U-TECK's Bend Radius Tool ensures the correct minimum bend radius of no less that 8" when installing #6 copper grounding wire. This tool helps safeguard proper grounding, and reduces risk of arc flash in a lightning event. Please keep bends at a 90 degree minimum.

Features:

- Easy, Convenient 8" Radius Guide
- Ensures installers stay up to Industry Standards with bends under 90 degrees and a radius less than 8" when installing bonding conductors
- Easily fits in any tool pouch
- Comes with built in level for using angles
- 8" reference is not just for mobility, it is a commonly recognized dimension across industries related to lightning surge protection

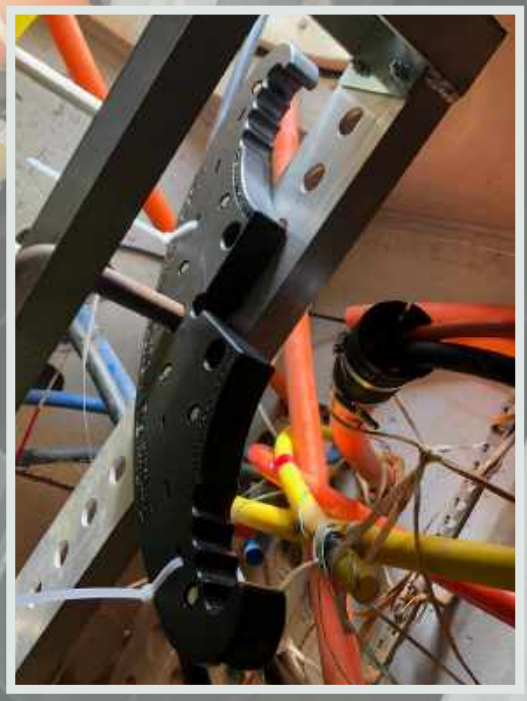
RAYDIUS FIBER QUADRANT BLOCK

U-TECK's New RayDius™ Fiber Quadrant Block is designed to protect fiber optic cable during installation. This product can be used as in Infeed Guide or an Outfeed Guide for Fiber Cable to prevent breakage, which can occur on some standard quadrant blocks. Pulling Diameter of 40" MBD (101cm), 600lbs (2700N) Max Cable Tension Load. *Always refer to recommended guidelines from cable manufacturers.



Features:

- Solid, Smooth, Cable Channel for consistent cable travel
- Lightweight,and Durable Design
- Ergonomic Grips for Safe Handling
- 6 CableKeeper slots for securing cable
- All Stainless-Steel Hardware
- Minimum Bend Diameter and Max Load info clearly visible
- Fits most all existing Jamb Skids, Hanger Arms, Hanger Blocks, Support Bars, and Pole Brackets

Using a new, gently curving solid design we were able to provide a smooth contour, while maintaining the required bend radius of the Fiber Optic Cable, and eliminating breakage caused from contact pressure.

This product will fit on all standard Jamb Skids, Hanger Arms, Hanger Blocks, Support Bars and Pole Brackets. The RayDius™ block has 6 unique CableKeeper slots for using Deltec™ strapping or tie wraps when you want to ensure that the cable continues to travel over the block without bouncing off. Using proper tools, such as the RayDius™ will also greatly reduce man hours spent trying to resolve internal cable breakage issues. The RayDius™ is also safer to utilize and lightweight for easier manuvering in small spaces with ergonomic grips molded into the design! Buy with or without the Ballistic Nylon Case!

The RayDius™ has gone through extensive wear and temperature testing and has exceeded all factory testing standards. ***And did we mention it's available at a fraction of the cost of traditional Quadrant Blocks?***
Not only that, but we are currently working on several products that will work with the RayDius™ - such as Aerial Pole Brackets to allow vertical and horizontal pivoting! Buy this product with or without the Carrying case - which features rigid side walls, padded shoulder strap and inside pockets!

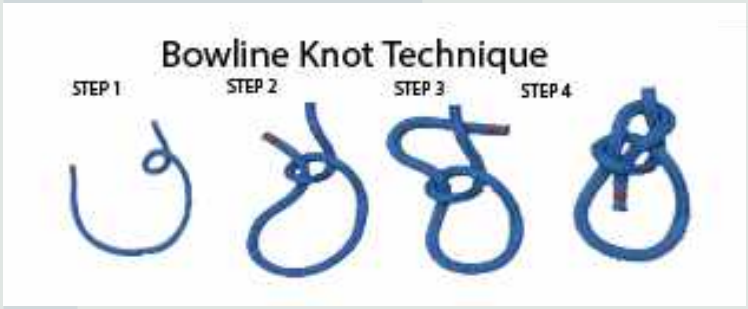
MESH BULK REEL

U-TECK's NEW Cable Pulling Mesh Bulk Reel provides an easy convenient means of pulling various sizes of Fiber Optic Cable. Our convenient bulk reel allows you to cut and fashion grips when needed.

Features:

- Extremely Strong (Rated to 700lbs)
- Adds minimal overall diameter to cable.
- 2 sizes for a wide range of cable diameter
- Cuts cleanly with little fraying.
- Abrasion resistant.
- Minimal Fraying

We recommend tying a simple bowline knot leaving a 3" minimum tail.



*Always refer to your cable manufacturers recommended maximum pulling weights.

*Always test knot for strength before using!

Pulling Sleeve Grips are also available in a package of 3!

CABLE PULLING MESH GRIPS

U-TECK's Cable Pulling Grips provide an easy convenient means of pulling various sizes of Fiber Optic Cable.

Features:

- Extremely strong. (Rated up to 700 lbs.)
- Convenient pulling loop.
- Kevlar thread for stronger hold
- Safer than other metallic grips.
- 60" total length.
- Adds minimal overall diameter to cable while pulling.
- 2 color coded sizes for a wide range of cable diameter.
- Abrasion resistant.
- Minimal Fraying
- Grips Can be used repeatedly after inspection

Made with Dual Polymer and Kevlar Construction. Radial Compression holds cables tightly during pull.

*Always refer to your cable manufacturers recommended maximum pulling weights.

*Always test Pulling Loop & Grip Body for strength before re-using by sliding protective cover down to inspect the pulling loop and sliding back into place.

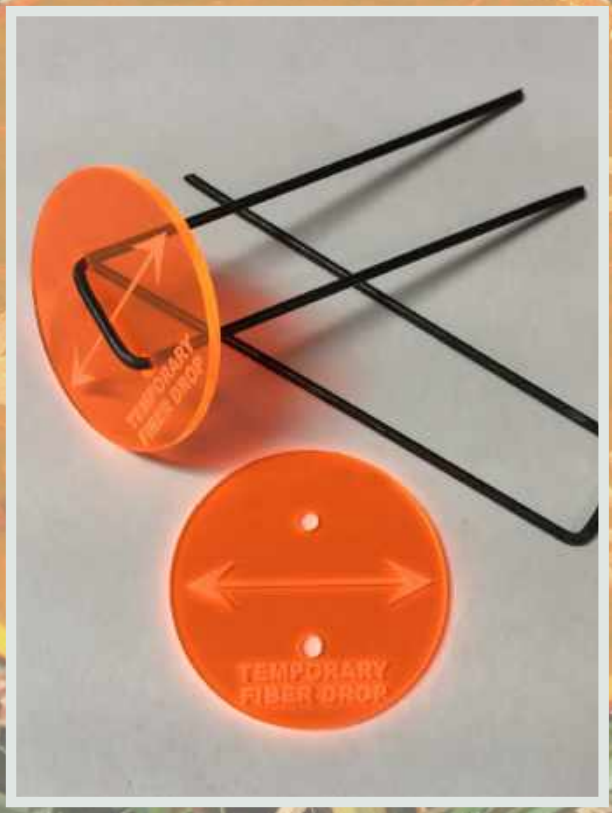
TEMPORARY FIBER DROP MARKERS

When new communication services are installed at a location, often a temporary cableis placed on the ground and left until such time as a crew can come and permanently bury the cable in the ground.

Features:

- Quick, easy, light weight
- 2.5" in diameter
- Highly visible fluorescent orange acrylic material
- Protects expensive cable drops prior to trenching
- Reusable



This leaves the cable vulnerable from damage caused by vehicle traffic, mowers and people tripping on the cable, not aware of its presence. U-TECK has developed a temporary solution to this problem. Our markers are made from a Highly Visible Fluorescent Orange Acrylic material that enhances the visibility of the cable and helps reduce damage that might occur.

Each marker is 2.5" in diameter. Simply insert the staple pin onto the marker disc with the message side up, straddle the cable with the marker, and push firmly into the ground. The arrow indicator should align with the direction of the cable. Space markers adequately for best results.

U-TECK's Temporary Fiber Drop Markers are meant to be reused. Fully customizable with your Logo and company colors!

FIRE RETARDANT INTERIOR BACKBOARDS

82K

U-TECK manufactures a full line of Fire Retardant Backboards for Telecom and Datacom Equipment Installations. Check your local building codes and requirements. These backboards make installations quick and uncomplicated for technicians and contractors on the move and come ready for interior or exterior applications!

Comes in White or Gray / Low Maintenance / Moisture and Termite Proof / ASTM Certified / UV Stable / No Splitting or Cracking

Our backboards are constructed of ¾" AC grade interior plywood purchased from sustainable forest wood manufacturers. They have 4 pre-drilled mounting holes, are sanded and then painted with gray or white fire retardant intumescent paint. The board is Class "A" rated per ASTM E84 (testing documentation available upon request). Our finished backboards are of the finest quality, and we have supplied backboards without any safety concerns or complaints regarding quality and reliability.

By specifying U-TECK Backboards, you can be sure you will uphold the quality and safety standards of your company while meeting todays construction guidlelines.

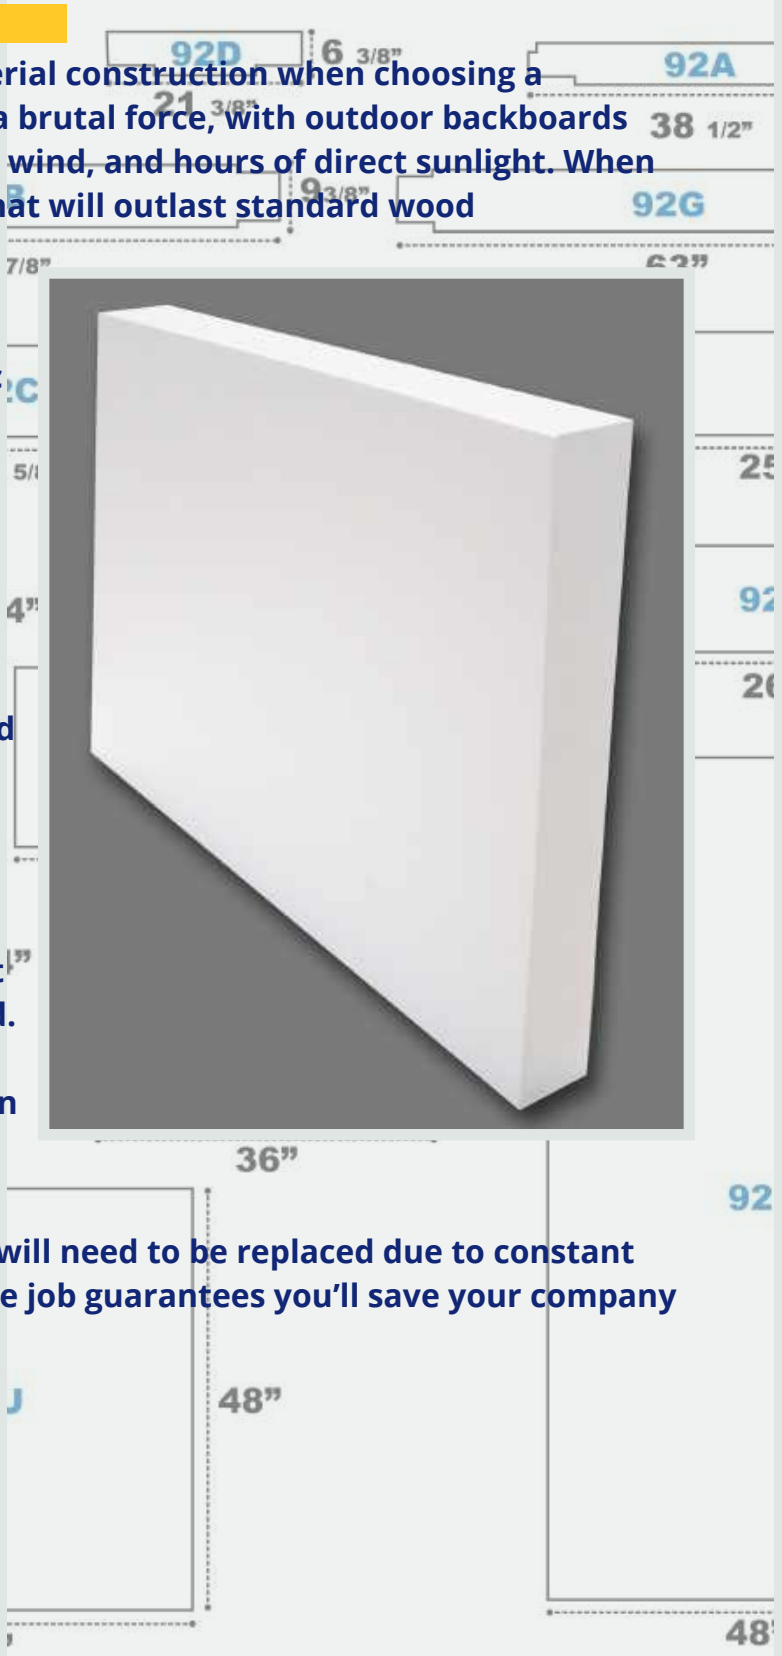
Offering the highest quality products available is always our top priority. This objective was never taken more seriously than when we were approached to produce a fire-retardant backboard for use with telecommunication equipment. While other manufactures offer products using just the paint testing to prove fire retardancy, we aimed for a Class "A" rating for the entire backboard! We submit random backboards to an outside testing lab to continuously test our finished units using the Steiner tunnel test. This test is conducted in accordance with the ASTM International fire-test response standard E84, to ensure our finished products can be labeled as Class "A" rated, the highest rating available within that ASTM specification.Every U-TECK Fire-Retardant Backboard comes with this Class "A" rating, along with the Class Rating Label affixed to each board! That makes ours the safest backboards available in the market today! Custom Colors are available!

EXTERIOR BACKBOARDS

U-TECK recognizes the need for long-lasting material construction when choosing a backboard for outdoor use. Nature itself can be a brutal force, with outdoor backboards being exposed to fluctuating temperatures, rain, wind, and hours of direct sunlight. When you choose an outdoor backboard, choose one that will outlast standard wood backboards for years of low maintenance use.

FEATURES:

- Constructed from 3/4” impact resistant plastic
- Paintable and ready to install
- Low maintenance
- Moisture and termite proof
- A size for every job
- No grain raise or knots
- No splitting or cracking
- UV stable
- Meets UL94 5V, UL 1975 and has a flame spread of 20 according to ASTM E84



Made from 3/4” impact resistant plastic, our Exterior Backboards are super tough and moisture proof. Available in any size configuration, this backboard will never rot, split or crack, yet can be drilled and painted like wood. It is perfect for any outdoor mounting use, including on cell towers to mount communication and power equipment.

Why mount your equipment to backboards that will need to be replaced due to constant weather exposure? Choosing the right tool for the job guarantees you’ll save your company time and money.

S WALL BRACKET

The S Wall Bracket is used to support strand on interior walls of either frame or masonry construction. Provide a 2" stand off from the wall.

VPN: UT-T639-4

HARDWARE MOUNTING FOR FIBER SNOWSHOE

4"The Fiber Snowshoe is used to secure a tap or other electronic device to a strand. This product includes a bracket, set of mating jaws, a carriage bolt, and square nut.

VPN: UT-U500-1

INSULATOR SUPPORT CLAMPS
Used in conjunction with cable clamps, one-bolt guy clamps, and bridle rings for attaching to structural steel members such as H or I beams. Provides bonding point for mobile homes, trailers, etc. (10 pack)

B CLAMP	VPN: UT-B1420
C CLAMP	VPN: UT-C3816

AERIAL STRAND HANGER BRACKETS
Designed to support aerial closures and terminals when more than one aerial cable is carried by the strand. The bracket clamps to the strand, circles around the upper cable, and provides a strand-like rod to which the aerial closure may be attached. No complex adapters or special tools required.

37" Bracket	VPN: UT-T556-21
40" Bracket	VPN: UT-T556-22

C BEAM CLAMP

The C Beam Clamp is used for intermediate attachments of strand to the flange of a structural steel member. (10 pack)

'POP N WORK' PED PAL TENT

Features:

- One door Tent with 'A' Shape Zipper Door
- Adjustable Anchoring Strap
- Quick-Pack Storage wrap for easy Storage
- Two sizes available

Cover Features:

- White 250 Denier Coated Polyester Sidewalls
- Safety Green 300 Denier Coated Poly Door / Back
- Urethane Coated Polyester
- Flame Retardant CPAI 84
- Water Repellent
- UV Rated

Frame Features:

- 18 Gauge Galvanized Tubing for the front legs
- Cold Rolled Steel Hinges
- 70% Glass Content Fiberglass rod tension frame on Rear Wall
- Pitched Roof

VENT TENT

U-TECK has developed the Vent-Tent, a portable shelter with more safety features than any other manufacturer currently has available in today's market

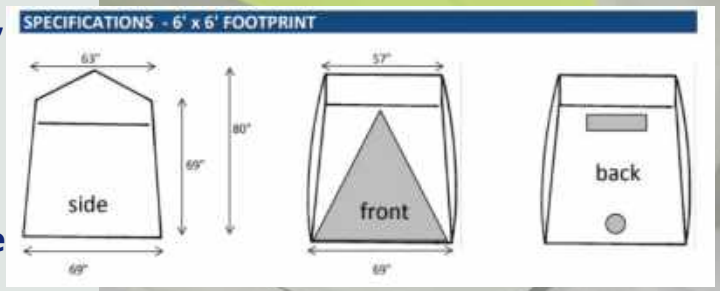
Features:

- Quick and easy set-up
- Many safety features
- Lightweight & compact
- Full circulation
- Non-corrosive hardware
- Reflective sides• No preshrinking
- Will not mildew
- 10" Blower Port in back

The Vent-Tent is specially designed to safeguard the craft person from fatal carbon monoxide build-up. The standard features that U-TECK installed allow air to be fully circulated by the following methods:

- Three of the sides have a lower-level vent, which allows for up to 18 inches of opening for air circulation at ground level.
- Two of the sides have a window, which may also be opened for upper-level air circulation.
- The combination of open lower-level vents and open windows allows for cross-ventilation, which eliminates the possibility of fatal carbon monoxide build-up.

U-TECK has also installed a "sock" in the back of the Vent-Tent to allow for a ventilator hose, blower, or heater-blower combination to be hooked up.



In addition to carbon monoxide protection, the Vent-Tent, with its roll-up bottom and side windows, is excellent on hot, rainy day

SENSIT P100

SENSIT P100 Offers a very simple two button operation for power, zeroing, and performing calibration. Multiple LED's beneath the frosted area create a very bright warning even in bright sunlight. Calibration is easy to complete manually or with the SCAL-100 calibration station.

The housing is constructed of durable ABS plastic and shock absorbing material to protect the instrument from the rigors of field use. The instrument is sealed to maintain the integrity of the IP65 rating.

FEATURES:

- Intrinsically Safe Design (Certified)
- One Button Operation
- Audible Alarm
- Visual Alarm
- Vibration Alarm
- STEL and TWA Alarms
- Alarm Event Memory
- Easy Field Calibration
- 2-Year Operation
- For use with SCAL-100 Test Stations

VENTILATOR ACCESSORIES

DUCT WITH QUICK CONNECT - Available in 25 or 15 foot sizes for any model. Our duct hoses are made of flexible, light duty, vinyl, woven polyester. Ducts are easily retractable and designed to handle large volumes of air at relatively low pressure. The ducts are flame retardant and easily connect to fan lips for positive and/or negative airflow. Model 1225-SC duct is dipped in static conductive material for safe use in hazardous environments.

PNEUMATIC VENTILATOR

For confined spaces that require a powerful ventilator that meets strict hazardous space standards, the UT-VAF-3000P delivers high-performance with uncompromising safety. With a forceful 1.5hp motor, the UAF-3000P can deliver both positive and negative airflow at an incredible maximum capacity of 2,063 CFM in the most difficult work environments.

FEATURES:

- CFM rating of 2,063 (58.4 m3)
- Weights only 28 pounds (12.7 Kg)
- Stackable to save storage or work space area
- Powerful 1.5 Hp pneumatic motor
- Capability to connect up to 125 feet (38 m) of straight duct
- Redirect stale compressed air away from the main air stream
- UL and C-UL listed for use in Class I, Groups A, B, C and D; Class II, Groups E, F and G; and Class III Hazardous locations

HIGH CAPACITY VENTILATOR

Designed for use in areas that require a greater exchange of air, the UAF-8000A promises performance. Equipped with a powerful 5hp motor, the UAF-8000A generates both positive and negative airflow at an outstanding maximum capacity of 9,968 CFM. Hold onto your seat, this 20.5 inch unit outperforms ventilators three or four times its size!

FEATURES:

- CFM rating of 9.986
- Weighs 119 pounds
- Powerful 5Hp electric motor
- Two built-in handles
- Dual-wall shell design
- Ideal for larger areas that require greater airflow

LIGHT INDUSTRIAL & UTILITY VENTILATOR

For a versatile portable ventilator with just the right amount of power, the UAF-1500 or 1500-230 (blower /extractor) is ideally suited for light industrial or utility applications. Perfect workhorses for small confined spaces such as manholes or sewers, these compact blowers deliver maximum airflow for a safe, comfortable, and controlled work environment. Your construction, utility, or telephone crews can depend on the UAF-1500 or 1500-230 to deliver a continuous flow of fresh air to blow and extract toxic or noxious gases.

FEATURES:

- CFM rating of 877
- Lightweight, only 18 lbs. (8.2kg)
- Stackable to save storage or work area space
- Capability to connect up to 50 feet of straight duct
- Ideal for manhole applications
- UL & CUL listed

INDUSTRIAL HIGH CAPACITY VENTILATOR

For confined spaces that require a power house air ventilator, the UT-VAF-3000A can handle your most demanding industrial needs. With a forceful 1 H.P. motor, the UT-VAF-3000A can deliver both positive and negative airflow at an incredible maximum capacity of 2,091 CFM in the most difficult work environments. No matter what your industry or application-construction, demolition, utility, paper mill, shipyard, power station, tank purging, or manufacturing-the UT-VAF-3000A is designed to take on the toughest of jobs.

FEATURES:

- CFM rating of 2796 (59.2 m3)
- Weighs on 32.5 pounds (14.74kg)
- Stackable to save storage or work area space
- Powerful 1Hp electric motor (.75 kW) capability
- Ideal for confined spaces that need greater airflow
- This model is available with an American 3-prong plug or with the European Shuko plug.

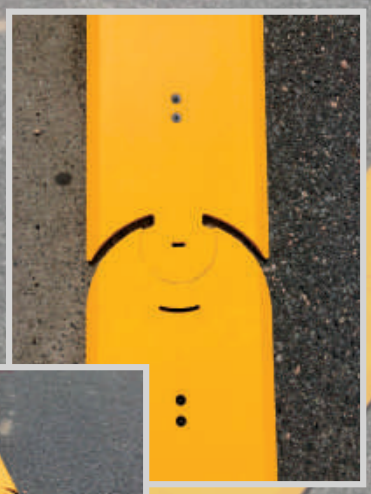
STREET SAVER & STREET SAVER MICRO TRENCH PROTECTORS

U-TECK's New "Street Saver" and "Street Saver Slim" Micro-Trench Protectors gives Fiber Optic Contractors added protection on their Saw Cuts, keeping the trench open and preventing breakage, prior to back filling. Using the Micro-Trench Protector results in a much cleaner looking finished product.



Features:

- Helps Prevent Edge Breakage Prior to Back Filling
- Two lengths available – 4' and 8'
- 3/4" 'fins' keep the product in place
- Street Savers Interlocked for Extended Coverage
- Sloped Edges on each side for Easy Ingress and Egress
- Constructed from HDPE - will not Break or Crack
- UV stable
- Results in a Cleaner Looking Finished Product

Two lengths and widths are available to assist in complete trench coverage, and linking The "Street Savers" together is simple using our interlocking design, which also allows for flexibility when micro-trenches are cut along curves.

For higher speed traffic or overnight construction, there are 6 holes which can be used for temporally screwing or bolting the Street Savers into place.

The "Street Saver" is Constructed from High Density Poly Ethylene (HDPE), will not break or crack under heavy traffic and are UV Stable. The Hi-Vis HDPE ensures increased motorist awareness to the construction zone. The Sloped Edges ensure ease for Ingress and Egress.

The "Street Savers" were designed to stay in place by utilizing the ¾" fins located underneath the product. These fins sit into the Micro Trench, ensuring the Micro-Trench Protectors will stay firmly in place.

MICRO-TRENCH TAMPER TOOL

The increase in fiber deployment initiatives have created the need for more cost effective ways of managing the task of fiber instaltion. Micro-trenching is one such solution

FEATURES:

- 14" long, 3/4" wide tamping end
- Tamping end constructed from 100% recycled solid plastic
- Welded, forged steel handle attachment
- Designed for quick and easy use

Micro-trenches are low impact slot cuts into roads,
sidewalks, etc, in which fiber is placed. This method offers quick and easy install, clean-up and surface repair, especially in urban areas. Although the widths and depths of these trenches vary based on local municipality specifications, the most common dimensions of the trenches are at least 1" wide, and up to 12" deep.

One challenge faced when placing fiber into these trenches is making sure the fiber is laying at the bottom of the entire trench in order to avoid potential future damage by road re-surfacing or other maintenance activities on the surface above. We've created a quick and easy tool that will ensure that your fiber is tucked neatly at the bottom of the trench and out of harms way. The 3/4" thick, 14" long tamper fits easily into the slot-cut, and, with it's curved end design, fits snug to the fiber cable without pinching or cutting. The tamper end is made from 100% recycled plastics fitted over welded forged steel. The straight 48" hardwood handle makes it easy to use and quick to tuck away in the back of your truck.

Please call the U-TECK Customer Service department now to order this unique Micro-Trenching Tamper Tool!

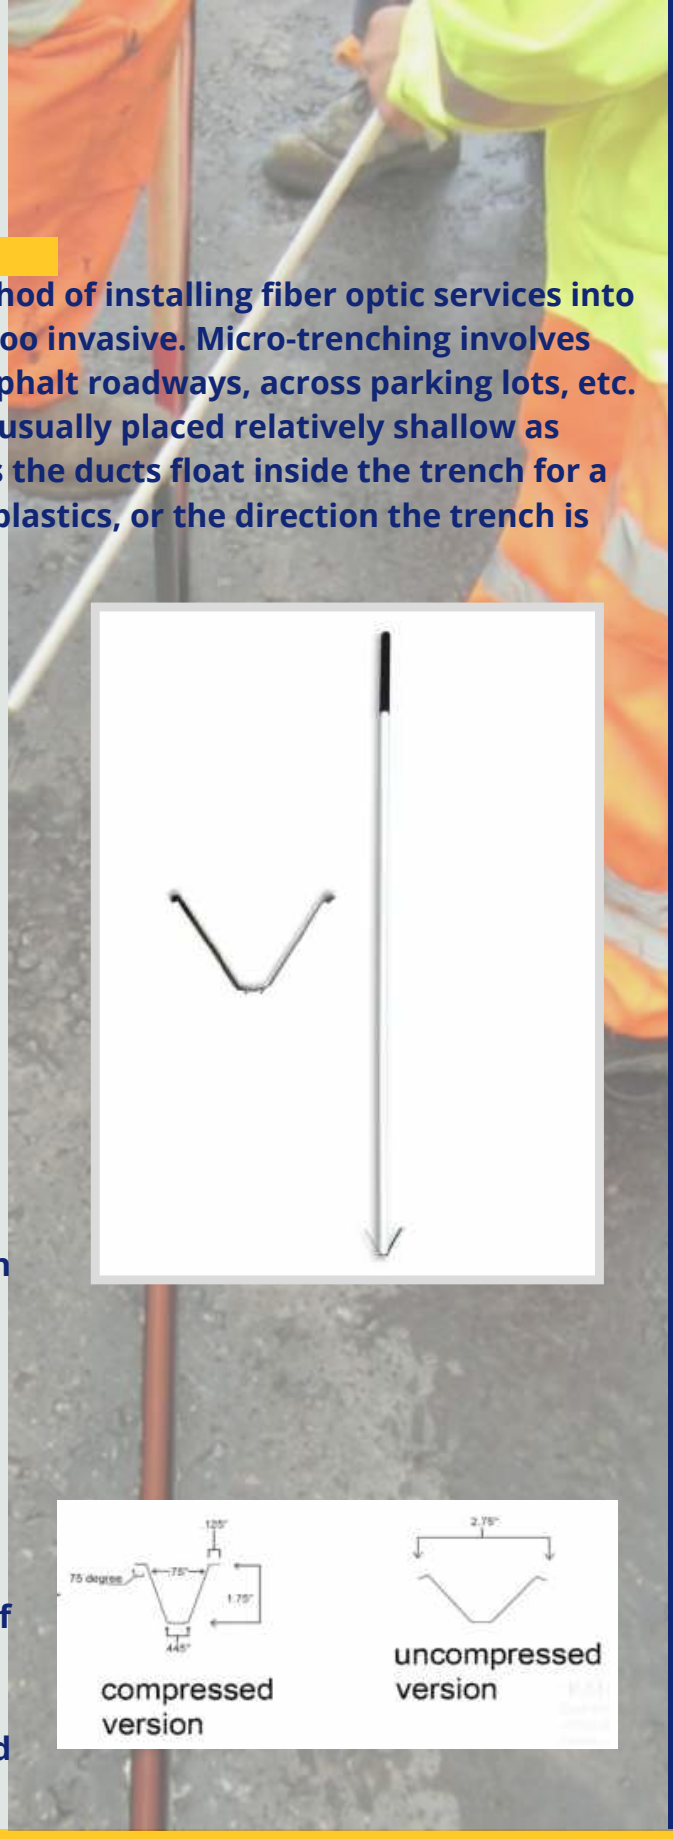
MICRO-TRENCH CLIP AND INSERTION TOOL



Micro-trenching has become a widely accepted method of installing fiber optic services into areas where traditional cable placement would be too invasive. Micro-trenching involves cutting a narrow trench into concrete sidewalks, asphalt roadways, across parking lots, etc. Microduct is then installed into these trenches and usually placed relatively shallow as compared to traditional cable trenches. Many times the ducts float inside the trench for a myriad of reasons, mostly from the memory of the plastics, or the direction the trench is taking.

Features:

- Quick and easy insertion into narrow trenches
- Prevents microduct movement when backfilling
- Clips constructed from durable stainless steel

U-TECK has developed an approved method of holding the duct firmly to the bottom of the trench by placing our new trench clips into the narrow gap of the trench and firmly against the duct. These spring clips expand and press against the sidewalls of the trench and hold the duct in place so that backfilling procedures can then take place.

To ensure clips work to their full potential, always install where the side walls of the trench are smooth and free from debris. The Micro-Trench Clips should be used in trenches dug in Hard Surfaces with clean cut edges.

These clips are installed using our trench clip insertion tool. A trench clip is attached to the tip of the trench clip insertion tool and then pressed into the gap of the trench and firmly against to the top of the duct. Trench clips are specially designed to release from the insertion tool as they are forced into the gap. Trench clips are packaged in a standard package on 1000 pcs.

UNIVERSAL LADDER WEDGE

Years ago, U-TECK combined a longtime, craft-accepted wooden ladder wedge design with polyethylene material to produce a rugged ladder wedge that can be warranted for up to five years. Using this material prevented paint scrapes and gouges by doing away with wood, and painting, all together; the color is molded throughout the polyethylene wedge. In reviewing this popular standard in ladder leveling, we found that the ladders most often used today by OSP personnel have transitioned to ladders with wider feet. Because of this research, we've increased the footprint size to each ladder wedge tier to accept up to 6-1/2" wide ladder feet. The "Universal" ladder wedge has all the same great features and load capacity as the original, but has now become much more versatile.

Features:

- Supports ladders with feet up to 6.5" wide
- Prevent Accidents
- Available in Safety Yellow and High Visibility Orange
- Positive Footing
- Extremely Rugged
- Anti-Skid
- Adjustable
- Metal or Rubber Cleats

The Ladder Wedge is used when a ladder must be put against a building, cable, or pole, and one leg does not touch the ground firmly, thus creating an unsafe climbing condition. The Ladder Wedge is placed under the unlevel foot to make the ladder steady.

The U-TECK Ladder Wedge is also needed on soft ground to prevent earth movement, which can cause the ladder foot to move while the user is climbing.

The Ladder Wedge was put through rigorous testing by an outside testing facility. Their material analysis report concluded that no visible evidence of any deformation or failure of the wedge was noted at our specified 375 lb. minimum load or at their standard 396 lb. load test stop point.

RUNG RUNNER LADDER CADDY

U-TECK introduces the Rung Runner™, the easiest way to carry and transport heavy extension ladders from vehicle to job site. Using a universal tether, you can now carry any type of ladder, including large extension ladders with solid rails.

Features:

- Can be used with any style of ladder
- Reduces worker fatigue
- Helps prevent back strains and injury
- Decreases property damage
- Increases single-worker productivity
- Fast and easy assembly with most ladders
- Off-sets ladder weight for safer single-worker use

The Rung Runner™ has a unique design that enables it to cradle any type of extension ladders on their side, reducing the ladder weight by as much as 90%. This is the easiest and most stable way to carry them.

Using the new Rung Runner™, worker fatigue is virtually eliminated, off-setting the weight of the ladder, making it lighter and more easily maneuverable into tight spots such as parking lots, construction sites, and into gated fences.

Worker productivity is increased because of the ease of getting ladders to and from the work site more quickly.

The framework is constructed of lightweight polymer and stainless steel, making U-TECK's Rung Runner™ extremely tough and durable.

STEP RUNNER LADDER CADDY

U-TECK introduces the Step Runner™ Step Ladder Caddy , the easiest way to carry and transport heavy step ladders from vehicle to job site. Using a universal tether, you can now carry any type of step ladder.

Features:

- Can be used with any style step ladder
- Reduces worker fatigue
- Helps prevent back strains and injury
- Decreases property damage
- Increases single-worker productivity
- Fast and easy assembly
- Worry-free tires (easy to maintain)
- Off-sets ladder weight for safer single-worker use

The Step Runner™ has a unique design that enables it to cradle any type of step ladders on their side, reducing the ladder weight by as much as 90%. This is the easiest and most stable way to carry them.

Using the new Step Runner™, worker fatigue is virtually eliminated, off-setting the weight of the ladder, making it lighter and more easily maneuverable into tight spots such as parking lots, construction sites, and into gated fences.

Worker productivity is increased because of the ease of getting ladders to and from the work site more quickly, while being able to carry additional tools and equipment at the same time.

The framework is constructed of lightweight polymer and stainless steel, making U-TECK's Step Runner™ extremely tough and durable

POLE MOUNTED LADDER BRACKETS

U-TECK's Pole Mounted Ladder Bracket line is used in conditions where Distribution Cabinets, UPS Cabinets and other equipment is mounted onto utility poles and where technicians are using ladders to access them. Too often the angle of the ladder is positioned under the cabinets creating an unsafe angle for the worker to stand, open the cabinet, and perform routine functions

Features:

- Provides Correct Ladder Positioning for Techs
- Permanently attaches to poles under Cabinets
- Attachment point for Safety Harness
- Powder Coated Steel and Stainless Hardware

*Pole Attachment Hardware Not Included

U-TECK's Pole Mounted Ladder Bracket line is used in conditions where Distribution Cabinets, UPS Cabinets and other equipment is mounted onto utility poles and where technicians are using ladders to access them. Too often the angle of the ladder is positioned under the cabinets creating an unsafe angle for the worker to stand, open the cabinet, and perform routine functions.
Our Pole Mounted Ladder Bracket puts an end to that unsafe condition. Our Brackets are permanently mounted under the cabinet and adjusted to the correct depth of the cabinet. Once installed, and the ladder deployed, the cabinet can be safely opened, and work performed, providing a safe and comfortable angle to work. These Brackets can be adjusted from 21" to 27" away from the pole using 2 stainless steel through bolts. Brackets are mounted to the pole using thru-bolts (not provided). Currently available in 3 colors.

U-TECK also offers a "fixed depth" ladder bracket. This bracket comes in 18", 21" and 24". This ladder bracket has all the same features but it cannot be adjusted away from the pole. This in turn offers a more ecomonical choice if you don't need the extra function.

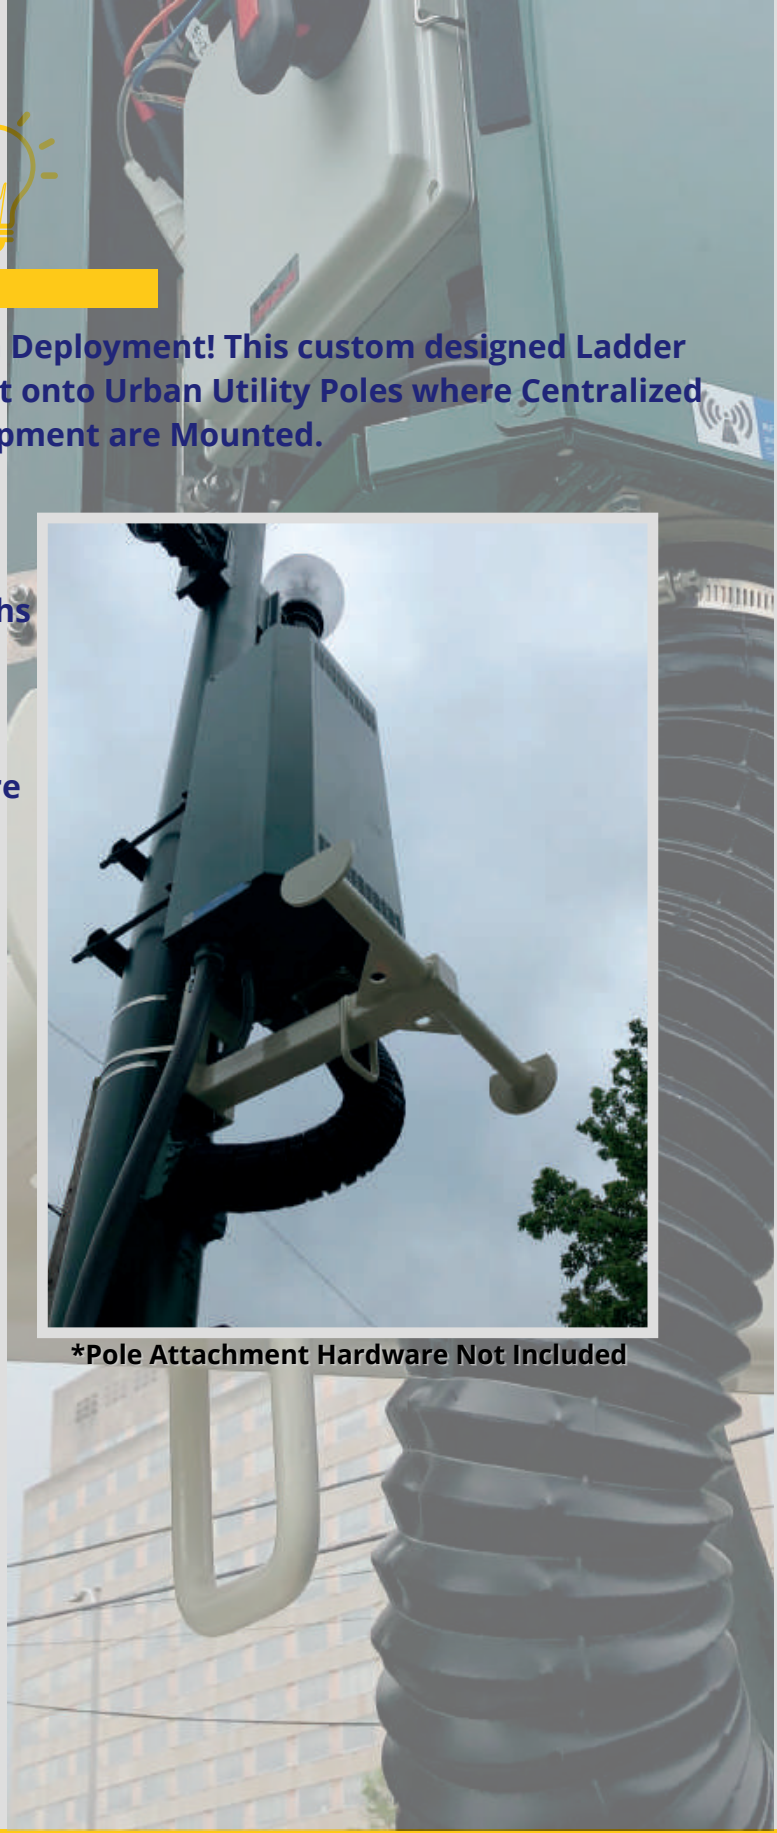
5G / CRAN LADDER BRACKETS



U-TECK's CRAN Ladder Bracket was built for 5G Deployment! This custom designed Ladder Bracket Provides a Safe and Sturdy Ladder Rest onto Urban Utility Poles where Centralized Radio Access Networks (CRAN) and Other Equipment are Mounted.

Features:

- Provides Correct Ladder Positioning for Techs
- Permanently attaches to poles beneath C-RAN's
- Attachment point for Safety Harness
- Powder Coated Steel and Stainless Hardware

Using the CRAN & 5G Pole Mounted Ladder Bracket means that there isn't a need for Bucket Trucks to be Dispatched for Routine Maintenance or for Quick Tasks thus Saving Time, Money, and Resources. CRAN Ladder Brackets are Permanently Mounted Beneath the Node Cabinet. Once installed, and the Ladder Correctly Deployed, the Node Cabinet can be Safely Opened, and Work Performed, providing a Safe and Comfortable Angle to Work.

POLE MOUNTED LADDER BRACKET

INSTRUCTIONS FOR USE

The U-TECK Pole Mounted Ladder Brackets are designed to provide safe access to FDH Cabinets while using a ladder. To work inside a FDH cabinet where a U-TECK Pole Mounted Ladder Bracket has been previously installed, follow these steps.

Extend the ladder to a height that allows it to rest against the bracket mount. Your ladder should be resting against the horizontal bar, between the ladder stops on the ends of the bracket. When adjusting your ladder, ensure that it isn't extended too far, or it will hinder you from accessing the FDH.

The LB has two round 'ladder stops' on each end of the mount bracket. These Stops prevent the ladder from sliding off the bracket and ensure the ladder is stable while being secured.

!!You should always adhere to all existing ladder safety procedures and requirements. Use these practices for securing the ladder to the pole!!

Now your technician will need to ascend the ladder and belt into the bracket. Ensure that all existing safety practices are always adhered to, to include proper angle, secure footing, and securing the base to the pole.

To belt into the bracket, pass the safety harness strap over the top of the ladder rung and through the safety harness loop. This loop is conveniently located on the TOP of the bracket. Now pass your safety harness back through the last rung of the ladder, and attach back to the belt.

ONLY USE APPROVED METHODS TO SECURE THE SAFETY STRAP! NEVER use the FDH Lift Point when securing the safety strap!

When descending, secure the FDH cabinet, safely detach your safety harness (while keeping three points of contact to the ladder at all times) and descend the ladder safely.

CABLE & WIRE STORAGE BOX

U-TECK has come up with a practical solution to the problem of storing and transporting drop wire, station wire, and aerial drop wire shipping boxes. Usually, these shipping boxes are out in the weather, getting wet, and disintegrating, making it more difficult to use them as they were intended. Also, theft of copper wire has become an ever increasing problem.

FEATURES:

- Two cable guides for easy payout
- Constructed from rustproof high density plastic
- Keeps contents dry in harsh conditions
- Measures 37” wide x 21” deep x 20” high
- Recessed soft grip handles
- Theft resistant key lock with 2 keys
- For added security, two padlocks can be added

U-TECK has developed a Cable and Wire Storage Box that fits neatly in the back of service trucks and vans, keeping these boxes of wire and cable dry, safe and secure.

Additionally, there are two cable guides on the front of the storage box so cable can be pulled from the inner boxes without having to unlock it. Each box is made from tough, high density, structural plastic, which will withstand the harshest elements.

With a soft-feel, recessed handle on each end and a keyed lock your cable, wire, and other contents are going to remain safe and ready when you need them.

REEL DEAL CABLE CADDY

Storing, transporting, and using your cable reels and pull lines on-site is no longer a multi-step process. With the new U-TECK Reel-Deal™ Reel Caddy, you can do all of this with one simple tool.

FEATURES:

- Constructed from 3/4" impact resistant plastic
- High visibility safety yellow
- Quick release spindle construction for easy reel loading
- Pivoting, rubber feet and wide base prevents sliding or tipping
- Compact design perfect for storage and transport
- Made in America

Made from solid 3/4" impact resistant plastic, the Reel-Deal™ can handle the everyday wear and tear all of your equipment is subjected to, and then some. The non-fading safety yellow color gives you extra visibility. Notched handle makes for easy pick-up and go!

Most reel caddy's have wheels or simple, easy to tip steel framing. The most important feature that makes the Reel-Deal™ stand out from the rest is the stout, compact design and pivoting rubber feet that allows on-the-spot security with no slipping, no tipping, even on unlevel terrain. Holds reels with a combined weight of up to 200 lbs!

Other unique features include the quick-release spindle construction for easy reel loading from either side, and the reel divider that allows each reel to move independently from the others. This allows you to pull cable from more than one reel – in opposite directions, at the same time!

Whether you do work for telecoms or CATV's, the Reel-Deal™ Reel Caddy is ready to go to work for you.

FIBER DROP CADDY

Are you or your Techs having a difficult time walking out Fiber Drops? Are your longer drop lines difficult to manage because they tend to 'spring' back? Introducing the solution to your problems! The ALL NEW Fiber Drop Caddy!

Features:

Fiber coil easily attaches to caddy with just ONE carabiner (included) OR zip ties (not included).
Can handle up to 1500' fiber drops!
Lightweight.
Easy to Store.
Fits multiple coil diameters from different manufacturers.

U-TECK's Fiber Drop Caddy is designed to hold and manage Fiber Drop Hand Coils. This caddy is adjustable to accommodate various inside diameters of coils from different manufacturers. The removable spool can be easily adjusted by removing the thumb screws, sliding the (six) black spacers within the yellow spool sides to the desired location, and reinserting the thumb screws.

An empty caddy weighs 28lbs and weighs 51lbs holding a 1000’ drop.

The weight keeps the caddy stable and in place while paying out fiber drop.

This caddy can also be used to pay out fiber coils, wire, or pull tape, that are already on a core with a 1.25” inside diameter and a 5.25" wide width, by using the spindle only.

BUCKET HEATER

The Bucket Heater was designed with special features needed for use in elevated buckets.

FEATURES:

- Solid Steel Construction
- Power 800w Reduced to 300w
- Inrush 13 Amps Reduced to 3 Amps
- BTU: 5200
- Voltage: 110 - 120
- Size: 6" x 5" x 5"
- Weather Resistant

A front louver face panel protects the heating element from being damaged by wire cuttings, tools, etc., while protecting the user from coming into contact with heating surface. The cord and heavy duty metal cabinet remain cool during long periods of operation. The Bucket Heater promotes safety first with waterproof cord grommets and rubber covered switch handles, no dangerous flames, no combustible fuel or burning coils. The heaters have an optional electric shut off if tipped in any direction, making these the safest heating units available for any work area. Three prong electric plug and heavy duty cord meet OSHA standards for this type of heater.

BIG BUDDY HEATER

This patented radiant 4,000-18,000 BTU Liquid Propane heater is the perfect solution for heating up to 450 sq. ft. An integrated fan increases the heating capacity of this unit, blending radiant and convection style heat to give you the best of both worlds.

FEATURES:

- Ideal for use in the Vent Tent (MID: 11351571)
- 4,000, 9,000, or 18,000 BTU per hour
- For use with propane gas
- Heats up to 450 sq. ft.
- Single control start knob
- Hi-Med-Low heat settings
- Swivel regulators
- Automatic low oxygen shut-off system (ODS)
- Accidental tip-over safety shut-off
- Connects to a 20 lb. cylinder with optional hose
- Fan operates on 4 D batteries

Two internal swivel regulators give you the ability to adapt usage from disposable cylinders to a remote gas supply with the purchase of a single hose and filter. (see below) To light the unit, simply push and rotate the knob. The built in Piezo sparking mechanism will take care of the rest. With the Oxygen Depletion Sensor (ODS) and accidental tip-over safety shut-off, you can be sure that you will enjoy years of comfortable outdoor safe heat.

DIELECTRIC UMBRELLA

U-TECK's line of dielectrically safe fiberglass umbrellas provides a variety of options for protection from the elements, rain or shine.

Features:

- High-visibility, heavy duty yellow umbrella with top air vents
- Fiberglass extension pole and skeleton
- Comes complete with adjustable tripod
- Offered with straight pole or with our exclusive Sturdy-Tilt locking hinge

Our exclusive Sturdy-Tilt option with locking hinge allows the user to adjust the angle of cover for shade from damaging ultraviolet rays or from driving rain. We've also moved the tilt higher up the pole, to off-set the weight, making the umbrella more sturdy

The optional window in the covering of the umbrella incorporates a piece of transparent plastic, which allows the worker to see obstacles or hazards that may be above the umbrella.

Each umbrella is constructed of materials that make it durable enough for use in high winds or
harsh weather yet light enough to be used on mowers, tractors, etc.

For safety, our umbrellas have a hardened fiberglass composite extension pole so that no metal-to-metal contact can be made. The Dielectric Umbrella comes standard with an adjustable tripod stand with three anchor stakes. Carrying bags for handling or storage are also available.

WORK UMBRELLA

U-TECK's line of umbrellas provides an economical method of protection from the elements, rain or shine. Unique tilt-top feature allows user to shade themselves from ultraviolet sun rays any hour of the day.

Features:

- Heavy-duty construction
- Reinforced vinyl canopy
- 3-position tilt optional
- Optional carrying case
- Aluminum/hardwood poles
- Pointed poles for easy set-up

Strong enough yet light enough to be used on mowers, tractors, etc.

For safety purposes, our umbrellas have a hardwood extension pole so no metal-to-metal contact with underground utilities can be made.

Our carrying bags are also unique in that each one has a separate pocket for the umbrella extension. This eliminates damage due to improper insertion of the umbrella.

We also offer two additional accessories as options for securing your work umbrella, the suction mount and the adjustable tripod stand. Both give you more freedom when placing your umbrella on the job, whether you are working next to cabinets or on hard surfaces.

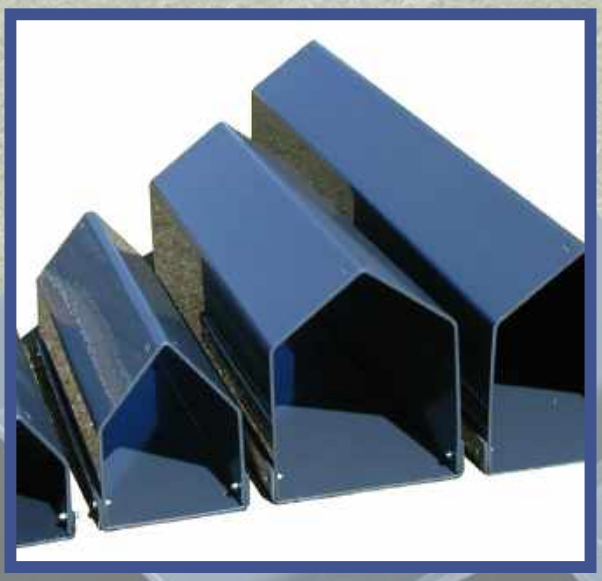
BURIED CLOSURE PROTECTIVE HOUSING

The Safe Way to Protect Your Pressurized Closures from Ghost Leaks and your Filled Closures from Damage! Pressurized Closure: The buried closure protective housing (closure coffin) is designed to protect your pressurized closure from the weight of the back-fill, as well as from the added weight of vehicles that run over the splice location causing costly "Ghost Leaks".

FEATURES:

- Simple to install
- No special tools required
- Durable
- Convenient
- Few piece parts
- Re-enterable
- Chemical-resistant
- Cost-effective
- High-impact plastic
- Environmentally safe



All pressure crews are very familiar with this problem: The weight of the dirt and road vibrations can cause the closure to become disfigured around the end plate, causing a small leak to occur.

When the dirt is removed the closure recovers and the leak goes away. This is why it is called a ghost leak. Also, if cables are not secured and protected where they entered a drilled plate, a ghost leak might occur. The Buried Closure Protective Housing can eliminate this.

Non-Pressurized: Even here, the closure can suffer damage from the weight of the dirt. We have come to realize that the re-enterable compounds do not provide the strength needed to withstand the weight. The Closure Coffin does. Also, in rocky areas, the sharp rocks can penetrate and deform many closures, allowing water to enter or causing damage from compression. Before the development of the Buried Closure Protective Housing, companies were using creosote- covered boards or other treated lumber, which decays, and sand or split pipe, which requires an excessive amount of labor.

Now, with the Buried Closure Protective Housing, you have a uniform method to assure your company that the closure will be protected for the life of the cable.

Pole Mounted Ladder Bracket

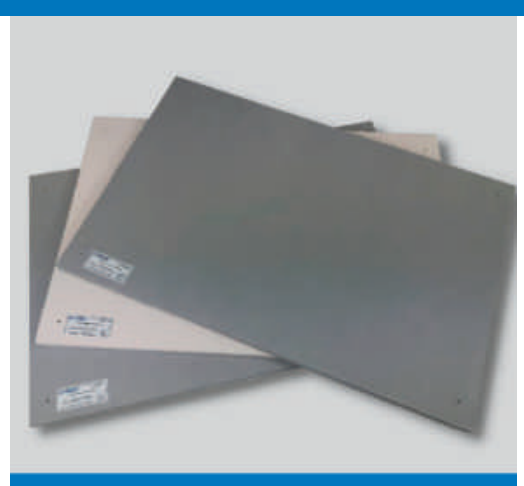
To be used in conditions where aerial equipment is mounted onto utility poles & technicians are using ladders to access them. This Product keeps your workers safe, and Eliminates the need to deploy Expensive Bucket Trucks. Comes in Almond, Green and Brown

VPN:55900

Splicer Seat

Made of molded, heavy-duty polyethylene. Keeps tools close at hand & offers three different working heights. Complete with adapter for the 710 Splicing Machine. Available in orange or grey

VPN: 55430



Fire Retardant Backboards

Quality, ready-to-install, equipment mounting boards. 3/4" interior & Exterior plywood, fire retardant and Class A rated. For Interior and Exterior use. ASTM Certified. Comes standard in White or Gray.

VPN: VARIOUS

FIBER DROP CADDY

Are you or your Techs having a difficult time walking out Fiber Drops? Are your longer drop lines difficult to manage because they tend to 'spring' back? Introducing the solution to your problems! The ALL NEW Fiber Drop Caddy!

VPN:59000

Fiber Splicing Workstation

The U-TECK Fiber Optic Splicing Workstation was designed from the ground up with the ever changing needs of todays splicing techs in mind. From tool placement, to comfortable working heights, we've tried to build the most user friendly workstation possible...and we are still improving!

VPN: 55701

Rung Runner Ladder Caddy

TECK introduces the Rung Runner™, the easiest way to carry and transport heavy extension ladders from vehicle to job site. Using a universal tether, you can now carry any type of ladder, including large extension ladders with solid rails.

VPN: 59501

RayDius Quadrant Block

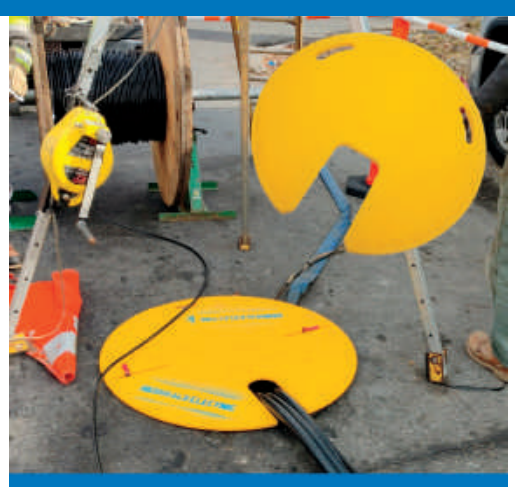
U-TECK's New RayDius™ Fiber Quadrant Block is designed to protect fiber optic cable during installation. This product can be used as in Infeed Guide or an Outfeed Guide for Fiber Cable to prevent breakage

VPN: 59200

Quadrant Block Support Bar

U-TECK's Quad Block Support Bar is ideal when using the RayDius Quad Block as a Lip Roller on the edge of a manhole or handhole. This Support Bar holds the Quadrant Block in place while pulling and guiding fiber cables into an underground duct.

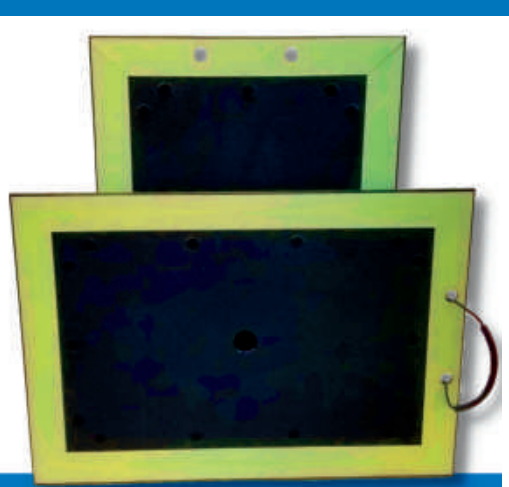
VPN: 59300



SAFE-T LID

Designed with complete safety in mind, U-TECK's Safe-T Lid Temporary Covers provide fall-in protection while you perform various functions with a manhole or handhole lid removed. Lightweight, holds up to 300lbs! Various sizes & Diameters available to fit your needs!

VPN:VARIOUS



ATTIC TRAX WALK BOARDS

Attic-Trax™ are used to assist a technician in traversing safely through an attic space while performing functions such as wiring, equipment installations, pest control, etc. Comes with two/pack - fits any size joist and holds up to 700lbs! Recharge GLOW strips in sunlight.

VPN:62028

UNIVERSAL LADDER WEDGE

The Ladder Wedge is used when a ladder must be put against a building, cable, or pole, and one leg does not touch the ground firmly, thus creating an unsafe climbing condition. The Ladder Wedge is placed under the unlevel foot to make the ladder steady.

SEALGUARD II KIT

FEATURES:

- Designed for high inflows in precast or brick-lined structures
- Stops leaks of up to 50 GPM
- Can be injected into flowing water with a reaction time of 3 seconds
- Dual-component polyurethane grout
- Permanent fix
- 45 PSI compressive strength
- Each set of grout contains one cubic foot of cured material that will not shrink

Repair Options

- Excavate and replace? – Very Expensive
- Reline with cements or elastomers? – Expensive, and the problem area must be dry
- Grout with cements? – Nothing more than a temporary patch
- Repair with chemical grouts? – Will wash out if the flow rate exceeds 1 to 2 GPM

None of these options will stop leaks of up to 50 GPM in seconds!

One manhole leaking 5 GPM will leak 7,200 gallons per day! If the cost of treating wastewater is $1.70 per thousand gallons, then this single manhole with a 5 GPM leak costs $4,467 per year. That is $4,467 per year forever.

The savings in wastewater treatment fees in the first year for a single manhole with a minor leak is over $4,000.

U-TECK™
Your Safety... Our Solutions.

159 Rock Hill Rd, Fayetteville,
North Carolina 28312
(800) 542-7011 / UTECK.COM

A SealGuard II Kit contains:

• Twelve sets of dual-component polyurethane grout • Twelve static mixers • Dual-component heavy-duty caulk gun • Safety goggles • Two pairs of chemical gloves • Safety clothing • Instruction sheet • MSDS sheet • Convenient waterproof carrying case • Top-notch support from SealGuard technicians

SealGuard II stretches your repair dollars!

• Each component can be reordered separately
• Larger quantities available (full and half pallets)

SealGuard II requires only these tools:

• Hammer drill; 5/8" masonry bit; Hammer; Flat-tip screwdriver; Knife; Putty knife;
• Rags, oakum or burlap

SealGuard II cleans up easily!

• Snap mixers (15 minutes after injection) with a sharp downward motion.
• Use a putty knife to scrape excess material from concrete.
• Dispose of waste foam with ordinary wood or plastic waste.

ATTIC-TRAX WALKBOARDS

Attic-Trax™ Walkboards are used to assist a technician in traversing safely through an attic space while performing functions such as wiring, equipment installations, pest control, etc. Constructed from durable composites that has beveled edges and corners, the Attic-Trax™ Walkboards feature four sturdy support rails underneath to prevent any movement once it has been put between the joists.

Features:

- 700 lb. load rating
- Made from lightweight composites
- Convenient detachable carrying handle
- Service temperature range: -4OF to 18OF
- High-visibility yellow edges for visual safety
- Works in attics with 16” or 24” OC joist spaces
- Quick-connect comfort handle for easy transport
- Two 18” x 26” work surfaces per kit

ATTIC-TRAX GLOW WALKBOARDS

With all the same great features, the all new Attic-Trax™ GLOW Walkboards come with High Quality Glow in the Dark Anti Slip Tape! Low light onditions and power outages in the workplace increase health and safety hazards, and doing your upmost to eradicate the problems that may arise can save you and your employees a lot of hardship. Our proprietary Attic-Trax™ "Glow" is manufactured using the latest technology in photo-luminescence to ensure our Walkboards are illuminated well enough for you to work safely and find your way.

The glow in the dark materials used to manufacture our Attic-Trax™ Walkboards are non-toxic, and free from any phosphorous or radioactive material. Photo-luminescent tape can take very little time to charge by absorbing artificial or natural light (recommended approx. 2 hours) by the use of photons. In a lights out situation glow in the dark tape emits a strong photo-luminescent reaction that can illuminate your path of work and travel.

Attic-Trax™ Glow meets class A classification, ASTM 2072, glowing for ~ 450 minutes.

SAFE-T LID & VERSA LID

Designed with complete safety in mind, U-TECK's Safe-T Lid Temporary Covers provide fall-in protection while you perform various functions with a manhole or handhole lid removed. Our Safe-T Lids are lightweight, yet very strong. Constructed from environmentally stabilized, high impact resistant polyethylene, it is strong enough to support over 300 lbs. of direct weight

Features:

- Available for use with Manholes or Handholes
- Made from high impact resistant polyethylene
- Environmentally stabilized to resist fading
- Lightweight and easily stored
- Custom sizes available

Featured on both the manhole and handhole temporary covers are openings along the edge large enough to accommodate cables that extend out of the hole, and two hand openings for easy transport, placement and removal.

Often splicing crews working inside splicing trailers beside a manhole need to provide additional fall-in protection from the public as well as the crew members themselves. Additionally, both types of Safe-T Lids Covers are also a great accessory for Utility Locators, who often must connect their equipment to the cables located in an existing man or hand hole while often leaving it unattended and unprotected.

The Safe-T Lid Temporary Cover for manholes can also be ordered with a transmitter hook. This allows the transmitter to be placed under the Safe-T Lid, reducing the possibility of damage or theft when the locator isn't looking. We offer various sizes of Safe-T Lid Temporary Covers to fit the following manhole sizes: 24", 28", 32", 36", and 38". The Safe-T Lid Temporary Covers for Handholes are available to fit the two most common handhole sizes: 24" x 36" and 30" x 48".Don't see a size to meet your requirement? CHAIN HOIST

This hoist is economical and designed for years of trouble-free use, with pulling applications ranging from 3/4 ton to 3 ton capacity. The lift ranges available are: 5' and 10' lift lengths

FEATURES:

- Simple design makes routine inspection and maintenance easy
- Steel construction with a rugged one-piece cast handle
- Freewheeling feature without load makes for quick load attachment
- Safety hooks swivel 360 degrees for easy rigging
- Induction hardened grade 80 load chain

This hoist is easy-to-use with it's one-piece cast handle and includes a completely enclosed Weston type automatic brake system for precise load spotting.

The chain is heat treated and hardened grade 80 load. The simple design makes routine inspection and maintenance easy and a freewheeling feature without load makes for quick load attachment.

The permanently lubricated gears and drop forged, swivel 360 degree, safety hooks make for easier rigging. Complies with OSHA standards and is ISO 9001 certified.

HANDI HOIST

U-TECK introduces the Handi-Hoist™, the easiest way to remove and replace heavy UPS batteries from aerial cabinets. The Handi-Hoist™ was designed to assist field technicians in the routine task of removing and replacing heavy UPS batteries that are often located in aerial cabinets. Traditionally this job was performed by dangerously overloading the lifting capacity of bucket trucks or were simply carried up and down ladders. Most aerial lifts or bucket trucks have a lifting capacity of just 300 lbs. When you add an average worker and a set of tools, there's not much left for heavy items. Both methods are very unsafe and often the result could be personal injury or property damage.

FEATURES:

- Attaches to any Wood, Composite, or Concrete Utility Poles
- Dual Safety Straps are quick and easy to lock down
- Non-Slip Rubber Pole Brackets are Universally Designed
- Payload Cannot Free Fall
- Rated lifting capacity of 175 lbs.
- Height lifting capacity of 30 feet
- Helps prevent personal injury
- Helps prevent property damage
- Folds for easy transport and storage
- Battery Sling and Cradle Included

U-TECK's Handi-Hoist™ is also very useful when installing Small Cell, or DAS Sites, installing Video Cameras, Traffic Cameras, Emergency Warning Sirens, Aerial Cabinets, etc. U-TECK designed a unique aerial hoist that is easily mounted onto a utility pole using 2, heavy duty, permanently attached, cinching straps. The rubber mounting brackets attached to the hoist frame have been designed using the profile specifications of many of the most commonly used utility poles. They are also capable of supporting the load in all kinds of weather conditions.

When choosing the proper winch mechanism for the Handi-Hoist™, much consideration was taken to provide a reliable, fail-safe way to raise and lower a payload while keeping personnel and property on the ground safe. U-TECK selected a worm-drive winch for this product. This type of winch cannot accidentally go into "Free Spool" and cause injury or damage. The payload can only be raised and lowered using an ordinary cordless drill. When you want a payload raised, you first put the drill in forward, attach it to the 5/8" stud on the bottom of the winch and pull the trigger. When you want to lower the payload, put the drill in reverse and lower away. It's that easy!

U-TECK™
Your Safety... Our Solutions.

Ordering Information

Description	Product Number	Dimensions	Weight
Handi-Hoist	55810	26.5" L x 13.75" W x 12.5" H	31 lbs

HANDI HOIST EASY STEP-BY-STEP INSTALLATION

Position Handi-Hoist at the desired location on the pole and strap it securely using the 2 quick cinch safety straps.

Lower winch line to the ground using a cordless drill with 5/8" socked adapter (adapter included).

Attach Battery sling to the carabiner clip on the end of the winch line and place battery on the shelf to raise.

Using cordless drill in the forward direction, press the drill trigger to raise payload to the desired position.

WeedEnder®

Thank you for your interest in U-TECK's exclusive WeedEnder Products. These products protect the environment while controlling unwanted vegetation.

WeedEnder® provides the best vegetation and weed control landscape fabric on the market today. Our products protect the environment, while controlling unwanted vegetation.

WeedEnder® will not puncture and break down like most landscape fabrics available for commercial use - and carry's a 20-year warranty.

WeedEnder's patented construction provides weed control without using poisons or herbicides. The material is constructed of durable 100% recycled Ethyleneterphthalate that prevents sunlight from penetrating, yet allows water and nutrients to wick through.

Often referred to as 'flexible concrete', WeedEnder is the perfect tool to add to your arsenal of vegetation control solutions.

UTILITY POLE MAT KIT

Maintenance crew members have thousands of miles of utility lines to cover in order to maintain all non-exempt equipment. For example, one utility company states that maintenance crews are responsible for inspecting and removing flammable material within a 12' foot radius around approximately 120,000 poles and transmission structures in State Responsibility Areas. These numbers continue to increase every year as more and more people move to rural areas and new power lines are added to support new communities. That's a lot of ground to cover!

FEATURES:

- Fire-Retardant
- Prevents Vegetation Growth
- 15 Year Warranty
- Easy to Maintain
- No Herbicides
- Easily Cut To Fit Any Area

So, how do you handle the ground level vegetation? Herbicides? Lawn mowers? Weed-whackers? Raking? All of the above?

There is an easier way! We've created the WeedEnder Utility Pole Mat, a fire-retardant mat that provides vegetation control within a 12' radius around the pole.

A mat so strong and durable that it carries a 15 year warranty!

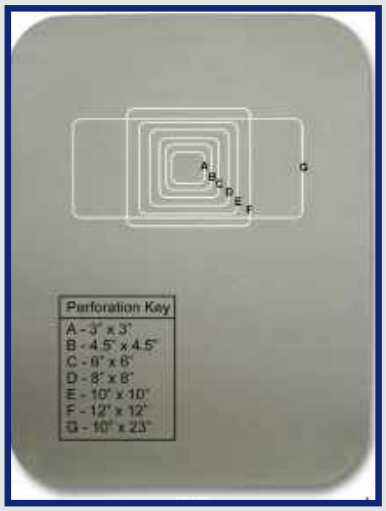
PED MAT SPECS

Ped-Mat 1 is die-cut and perforated to fit around most round pedestals.
Ped-Mat 2 is die-cut and perforated to fit around most square or rectangular pedestals.
Ped-Mat 3 is not die-cut and fits in those hard-to-fit areas, such as next to poles, other pedestals, or other obstructions. You cut to fit.



WeedEnder™ Rolls: Available in 3' and 6' Width X 25' length. Longer rolls are available.

Joining Strip is a 4" x 25' strip to join (splice) the WeedEnder™ rolls.

Hardened Steel General Purpose Spiral Spikes are 6" long and are designed to hold the mat in place. Packed 100/Box.

316 Stainless Steel Staples measure 1 1/4" x 5/8" and are packed 2,000 per box. These are used to join two widths of WeedEnder™ material with the joining strip.

Manual Staple Gun holds 150 stainless steel staples and is pre-set to allow staple penetration through the material for splices and repairs.

Adhesive/Caulk is specially formulated for primerless adhesion to the WeedEnder material and the metal or wooden guardrail posts (in wet or dry conditions) to inhibit weed growth.

PED MAT

U-TECK has developed a herbicide-free alternative to control unwanted vegetation around pedestals. The solution is now known as WeedEnder™ Ped-Mat.

Comprised of a dense, multi-directional needling of specially formulated synthetic polyester fibers, the material is additionally impregnated with a special resin with ultraviolet inhibitors and fire resistant properties. Constructed from 100% recycled material, WeedEnder ™ increases visibility, decreases herbicide use and site maintenance, and proves to be extremely durable.

FEATURES:

- Fire-retardant
- Long-lasting 15 year warranty
- Improved visibility, reduces damage
- Easy to install
- Made from Recycled Plastic
- No Runoff
- No herbicides

While Ped-Mats increase visibility around your pedestals, it is also great for public relations by eliminating unsightly overgrown grass around pedestals or other fixtures on or next to someone's manicured lawn. You get all of these benefits without the burden of weed-eating or unsightly herbicide use.

WeedEnder™ is also available in rolls for a larger coverage area. Rolls can be from 1 ft to 8 ft wide, and up to 250 foot length. Installation is simple. Determine the size of the pedestal and cut the Ped-Mat along the appropriate perforated lines and stake in place.

Choose the right material for the right job.

Prismatic ~ Wet conditions

This material reflects back color and utilizes thousands of micro-prisms that are covered by a transparent film. Due to this protective layer, it performs exceptionally well in wet conditions and resists abrasion compared to glass bead.

Glass Bead ~ Warm conditions

Silver glass bead material is made of microscopic glass beads adhered to fabric, which creates a more flexible and lightweight reflective option. While ideal in many environments, especially warm ones, its largest drawback is that it loses reflectivity when wet and can abrade in rough environments.

Your garment's reflective material should stand out from the work environment.
