

LADDER SPLICING PLATFORM

U-TECK's new Ladder Splicing Platform solves the problem of Splicing while on a ladder!

Transporting and assembling a makeshift splicing platform while trying to maneuver up extension ladders was, in the past, a difficult and UNSAFE task.

Our ALL NEW Splicing Platform attaches directly to the ladder for a secure, stable work area that measures 13.5"x9.5". The all NEW Splicing Platform is strong (but lightweight) and can be adjusted for splicing on either the left or the right side to accommodate dexterity as well as any interference that may occur on either side while splicing. The LSP is incredibly versatile- it works with EVERY ladder we have been able to find! Secure your splicing machine with the Captive Knob (included) and splice comfortably - at NIOSH recommended 75°- while working atop ladders!

We've also included a slot to accept our 5-pocket tool pouch to keep an assortment of tools conveniently at hand.
