# FIBER OPTIC SPLICING WORKSTATION

U-TECK is proud to offer the next generation fiber splicing workstation to support fiber splicing at the splice or optical network terminal (ONT). The NEW! Fiber Optic Splicing Workstation has a larger work surface, but offers the ability to fit in most work sites. It can be used as a freestanding workbench or in narrow manhole environments, inside tents, central office work, and light enough for aerial work in a bucket or attached directly to the cable support strand by removing the work surface from the stand.

## Features:

- Portable workbench
- Large work surface
- Compact fold-up
- Built in slots & holes for tools
- Heavy duty steel legs
- Quick-attach standoffs for hanging
- Adjustable height
- Cable management attachment included

The heavy duty, steel legs lock firmly to the work surface at heights of 32" and 40" tall, keeping your table at a comfortable working level. Our unique Cable Management Bracket fits securely on either side of the workbench, allowing jacketed strands to stay put and separated until you need them.

Separate the work surface from the stand and quickly attach the two unique stand-off props with adjustable webbing into the 4 accessory slots and you can take your work table to new heights, giving you a secure and level work surface when hanging it over terminal casings inside data rooms, closets, and outdoors against a wall for wall-mounted ONT's or NID's.

(800) 542-7011 / UTECK.COM

Attach the Aerial Strand Cables into the 4 accessory slots and your table is right where you need it for work at the cable support strand while working from an aerial bucket truck.

The Workstation surface area is approximately 35-1/2" x 22-1/2", with an inside recessed area of 22" x 18" and a weight capacity of 100 lbs. Slots and holes are molded into the table to conveniently hold tools, parts, splicing sleeves and other splicing equipment. This recessed area prevents small pieces from rolling off. The table folds up neatly for quick and easy transport and storage. If you use the Workstation with the table top, floor stand and cable management bracket, it will weigh in at 17.63 lbs.

Hanging the Workstation using just table top, stand-offs, and the cable management bracket, the total weight is a mere 10.27 lbs!

No matter where your fiber splicing duties take you, you'll want to have this lightweight Workstation available at all times. Durable, portable and stable, this will become a standard in your splicing environment.

# FIBER SPLICE CASE STAND

The *Fiber Splice Case Stand* is a portable support stand designed to hold fiber closures when performing splicing duties. It works great in conjunction with our *Fiber Optic Splicing Workstation*! U-TECK's newly improved *Fiber Splice Case Stand* now allows a splicing technician to securely hold the splice case in both the horizontal or vertical position while performing splicing functions or maintenance, a helpful feature when space is limited! It is strong, lightweight and able to fit your real-world splicing environments. Simple to use, it sets up quickly with your fiber case held securely to the stand platform with self gripping, velcro straps.

## Features:

- Secures splice cases for fiber work
- Portable and lightweight construction
- Locking safety hinge pin platform and knob-style tension locking legs
- Can be used Horizontally or Vertically
- Works with most splice case sizes
- Load capacity 132 lbs.
- Maximum tripod height is 63" with a minimum of 40"

The *Fiber Splice Case Stand* is built for years of repeated use. The support beam is constructed from lightweight aluminum that secures the polymer platform and a heavy-duty hinge with locking safety pin for maximum strength/security, with a sturdy cable guide. The tripod is made of reinforced metal tubing and the legs feature knob-style tension locking.

Create your ideal work environment with the *Fiber Optic Splicing Workstation* and the *Fiber Slice Case Stand*!

**U-TECK™**

Your Safety... Our Solutions.

159 Rock Hill Rd, Fayetteville, NC 28312  
(800) 542-7011 / UTECK.COM

## Ordering Information

Description:

FIBER SPLICE CASE STAND

Product #:

55712

The footprint of the *Heavy-Duty Tripod* can also be adjusted depending on the space you have to work.

The *Splice Case Support Rest* and the *Splice Case Support Plate* are both adjustable depending on the size and type of closure to be secured.

The *Support Plate* comes with 2 sizes of *Velcro Strapping* to secure the splice case to the *Stand*.

When used in conjunction with U-TECK's *Fiber Splicing Workstation*, splicing functions are performed in an organized and comfortable environment.

To assemble, simply slide the *Support Rest* onto the *Support Bar* and tighten the *Set Screw* into the desired position.

To change the horizontal or vertical direction of the *Splice Support Bar*, insert the *Support Bar Hinge Pin* for horizontal or remove the Hinge Pin for vertical.

# LADDER SPLICING PLATFORM

U-TECK's new Ladder Splicing Platform solves the problem of Splicing while on a ladder!

Transporting and assembling a makeshift splicing platform while trying to maneuver up extension ladders was, in the past, a difficult and UNSAFE task.

Our ALL NEW Splicing Platform attaches directly to the ladder for a secure, stable work area that measures 13.5"x9.5". The all NEW Splicing Platform is strong (but lightweight) and can be adjusted for splicing on either the left or the right side to accommodate dexterity as well as any interference that may occur on either side while splicing. The LSP is incredibly versatile- it works with EVERY ladder we have been able to find! Secure your splicing machine with the Captive Knob (included) and splice comfortably - at NIOSH recommended 75°- while working atop ladders!

We've also included a slot to accept our 5-pocket tool pouch to keep an assortment of tools conveniently at hand.

# SPLICER SEAT

U-TECK has combined a longtime, craft-accepted design with a new polyethylene material to produce a rugged splicer seat that can be warranted for up to five years.

With the U-TECK Splicer Seat, there is never a need for water treatment because it is waterproof. No need for painting, either; the color is molded into the seat. And no worries about splintering. It is ouchless! This seat can be drilled to attach other equipment, such as splicing machines.

## Features:

- Extremely rugged
- Convenient tool slot
- Traditional design
- Large sitting area
- Polyethylene material
- Textured surface
- Five-year warranty
- Available in grey & safety orange

U-TECK has even included a handy tool slot in the top to hold your tools, connectors, or other small items when you need them close at hand.

Conventional splicing machines can be attached to the Splicer Seat. The unique design of the seat allows it to be used at three different positions for varied heights. The Splicer Seat also makes an excellent footstool. With this seat, you will never need to purchase a replacement again.

# SPLICER SEAT ACCESSORIES

## MS2 Splicer Adapter

Fits on your MS2 Splicing tool to easily attach and remove it from the splicer seat

**Tool Base Adapter**  
Assists you when permanently attaching your 710 splicing tool to the Splicer Seat

## Seat Cushion

Thickly padded cushion in a weather-resistant cover. Comes complete with three large pockets for tools and materials.

## Splicing Mat

3 ft x 4 ft rugged, washable and reusable pad that covers the work area. keep your cables out of the dirt and your tools out of the mud and weeds!

## Universal Splicing Head Adapter

Used to temporarily attach either a 710 or MS2 splicing machine to the Ergonomic Seat or the 'P' Splicer Seat. Can be mounted in several locations as desired by individual splicers.

## Retro Fit Kit

Allows the upgrade from the Splicer Seat to the Ergonomic Seat. Includes the splicer seat adapter, the Ergonomic Seat and even the drill bits to drill the holes.

## Splicing Arm Base

Fits under your Splicer Seat to attach your modular splicing tool when you do not want to attach it directly to the seat.

## 710 Splice Adapter

Fits on your 710 modular splicing tool to easily attach and remove it from the Splicer Seat

# WORKCENTER ERGO SEAT

U-TECK has taken a field-proven and craft-accepted design—the “P” Seat—and incorporated it into The WorkCenter, the newly designed Ergo Splicer Seat workstation. The upper portion of this seat removes easily, making setup possible even in tight, hard-to-maneuver spaces

## Features:

- Anti-Skid Bottom
- Convenient Tool Slot
- Swivel 360 Degrees
- Seat Back and Cushion Area removes and Folds up
- Weather Resistant
- All Hardware is Stainless Steel
- Breaks down For Tight Places & Easy Storage.
- Seat Can Be Used With or Without Back
- Base is available in Grey & High-Vis Safety Orange

The WorkCenter as a complete unit is available to be ordered, or you can purchase a simple kit which will retro fit the thousands of existing Splicer Seats that are being used by companies today. This will result in a tremendous savings for your individual budget.

The multi-faceted unit is also the toolbox personnel are accustomed to, which lets them keep their tools and materials convenient during an entire operation.

U-TECK has also designed a new Universal Splicing Head Adapter for mounting splicing heads to the seat base. This adapter will accept virtually any splicing machine. It may be mounted in different positions to accommodate the preference of the individual splicer. This makes the WorkCenter a complete workstation.

# FIBER OPTIC PROTECTOR SLEEVE

U-TECK's Fiber Optic Protector Sleeves were developed to protect and strengthen fusion splices on fiber cables. The construction of the three separate protective and strengthening elements of the sleeve are distinctive in the function that each provides.

The inner stainless steel pin keeps the sleeve rigid and stable. The pins are vibratory tumbled with a special medium. This eliminates the possibility of fiber scarring or material penetration, preventing damage to sensitive glass fibers.

The outer tube is manufactured of a heat shrinking polyolefin. This encloses the inner tube and the encapsulated fiber splice, providing double protection and ensuring that moisture and air are eliminated from the fiber splice.

U-TECK's Fiber Optic Protector Sleeves are available in a standard length of 2 3/8" and are adaptable with all standard organizers. However, various lengths are available upon request.

# MAGIC WRAP

Magic Wrap® is an Emergency Repair Kit on a Roll. A poly-butyl rubber compound, Magic Wrap® is activated when stretched. This activation causes Magic Wrap® to adhere to itself. Thus, any object which can be spiral wrapped can be repaired or sealed

Magic Wrap® is ideal for use on dirty or wet surfaces. Because there is no adhesive, there is no reason that dirt or moisture will cause it to fail. Repairs can even be done underwater!

## Magic Wrap® is ideal for the following repairs:

**Automotive** – will repair engine hoses, even fuel lines (to repair fuel lines, the white liner must be used first, then the Magic Wrap® over top of the white liner. The white liner prevents any reaction between the fuel and the Magic Wrap®.)

**Electrical** – UL listed

**Plumbing** – works on copper and PVC pipes under pressure – no need to turn off the source of water

**Sealing, weatherproofing, splicing, covering, holding/bundling, joining and repair applications**

**General Household repairs**

**Sporting goods** – grips for hockey sticks, tennis rackets, fishing rods

**U-TECK™**

# RayDius FIBER QUADRANT BLOCK

U-TECK's New RayDius™ Fiber Quadrant Block is designed to protect fiber optic cable during installation. This product can be used as in Infeed Guide or an Outfeed Guide for Fiber Cable to prevent breakage, which can occur on some standard quadrant blocks. Pulling Diameter of 40" MBD (101cm), 600lbs (2700N) Max Cable Tension Load. \*Always refer to recommended guidelines from cable manufacturers.

## Features:

- Solid, Smooth, Cable Channel for consistent cable travel
- Lightweight, and Durable Design
- Ergonomic Grips for Safe Handling
- 6 CableKeeper slots for securing cable
- All Stainless-Steel Hardware
- Minimum Bend Diameter and Max Load info clearly visible
- Fits most all existing Jamb Skids, Hanger

Arms, Hanger Blocks, Support Bars, and Pole Brackets

Using a new, gently curving solid design we were able to provide a smooth contour, while maintaining the required bend radius of the Fiber Optic Cable, and eliminating breakage caused from contact pressure.

This product will fit on all standard Jamb Skids, Hanger Arms, Hanger Blocks, Support Bars and Pole Brackets. The RayDius™ block has 6 unique CableKeeper slots for using Deltec™ strapping or tie wraps when you want to ensure that the cable continues to travel over the block without bouncing off. Using proper tools, such as the RayDius™ will also greatly reduce man hours spent trying to resolve internal cable breakage issues. The RayDius™ is also safer to utilize and lightweight for easier maneuvering in small spaces with ergonomic grips molded into the design! Buy with or without the Ballistic Nylon Case!

The RayDius™ has gone through extensive wear and temperature testing and has exceeded all factory testing standards. *And did we mention it's available at a fraction of the cost of traditional Quadrant Blocks?*

Not only that, but we are currently working on several products that will work with the RayDius™ - such as Aerial Pole Brackets to allow vertical and horizontal pivoting! Buy this product with or without the Carrying case - which features rigid side walls, padded shoulder strap and inside pockets!

RayDius™ Fiber Quadrant Block	59200	9 Lbs
Balistic Nylon Carrying Case w/ padded strap	59225	3.8 Lbs

# QUADRANT BLOCK SUPPORT BAR

U-TECK's Quadrant Block Support Bar is ideal when using the RayDius Quadrant Block as a Lip Roller on the edge of a manhole or handhole. This Multi-Position design also works well off the grounds surface to ensure proper cable travel.

Additional bars can be attached for extra stability. This Support Bar holds the Quadrant Block in place while pulling and guiding fiber cables into or out of an underground duct, manholes, or handholes.

Weighing just 6 pounds, this support bar is constructed of Non-Conductive materials and can be used with other Quadrant Blocks on the market as well.

Each Support Bar Bracket has 2 rubber bumpers to prevent slippage once it has been positioned.

## Features:

- All NON-CONDUCTIVE materials
- Lightweight, and Durable Design
- Can be used with most Quadrant Blocks
- Rubber Bumpers Prevent Slippage

# SuperJamb Jamb Skid

**INTRODUCING THE ALL NEW U-TECK SuperJamb Jamb Skid! This product works with our RayDius Fiber Quadrant Block, Quad Block Support Bar and Quad Block Coupling Bar.**

**Our all new lightweight design makes cable placement in communications vaults easier than ever before! Gone are the bulky, cumbersome jamb skids of the past!**

**The SuperJamb Jamb Skid sets up within minutes, and due to its lightweight construction is easy to maneuver and reposition if need be while inside the vault. Cables can be attached and detached easily to quadrant block or cable sheaves. Extends from 73" to 114".**

**The adjustable pressure bar provides side lateral support to ensure the SuperJamb Jamb Skid stays secure while in use. Extends from 48" to 110"**

## Features:

- Lightweight and easy to use
- No tools needed!
- Can be set up quickly by one person in minutes
- Provides secure mounting location for RayDius Quad Block, or sheaves, to ensure minimum bend diameter is met
- Adjustable positioning of Quad Block allows easy configuration for infinite pulling scenarios.
- Adjustable Pressure Bar provides Side Lateral Support
- Allows for more room while working in cramped and congested environments

# RADIUS BEND TOOL

U-TECK's Bend Radius Tool ensures the correct minimum bend radius of no less than 8" when installing #6 copper grounding wire. This tool helps safeguard proper grounding, and reduces risk of arc flash in a lightning event. Please keep bends at a 90 degree minimum.

## Features:

- Easy, Convenient 8" Radius Guide
- Ensures installers stay up to Industry Standards with bends under 90 degrees and a radius less than 8" when installing bonding conductors
- Easily fits in any tool pouch
- Comes with built in level for using angles
- 8" reference is not just for mobility, it is a commonly recognized dimension across industries related to lightning surge protection

# MESH BULK REEL

U-TECK's NEW Cable Pulling Mesh Bulk Reel provides an easy convenient means of pulling various sizes of Fiber Optic Cable. Our convenient bulk reel allows you to cut and fashion grips when needed.

## Features:

- Extremely Strong (Rated to 700lbs)
- Adds minimal overall diameter to cable.
- 2 sizes for a wide range of cable diameter
- Cuts cleanly with little fraying.
- Abrasion resistant.
- Minimal Fraying

We recommend tying a simple bowline knot leaving a 3" minimum tail.

\*Always refer to your cable manufacturers recommended maximum pulling weights.

\*Always test knot for strength before using!

Pulling Sleeve Grips are also available in a package of 3!

# CABLE PULLING MESH GRIPS

U-TECK's Cable Pulling Grips provide an easy convenient means of pulling various sizes of Fiber Optic Cable.

## Features:

- Extremely strong. (Rated up to 700 lbs.)
- Convenient pulling loop.
- Kevlar thread for stronger hold
- Safer than other metallic grips.
- 60" total length.
- Adds minimal overall diameter to cable while pulling.
- 2 color coded sizes for a wide range of cable diameter.
- Abrasion resistant.
- Minimal Fraying
- Grips Can be used repeatedly after inspection

Made with Dual Polymer and Kevlar Construction. Radial Compression holds cables tightly during pull.

\*Always refer to your cable manufacturers recommended maximum pulling weights.

\*Always test Pulling Loop & Grip Body for strength before re-using by sliding protective cover down to inspect the pulling loop and sliding back into place.

# FIBER COIL TURNTABLE

The BRAND NEW Fiber Coil Turntable is for use in the field when fiber coil deployment is difficult, and there is a MFT/MST attached to the coil.

No more worry about spring back or backlash - the FCT eliminates those problems!

U-TECK's Fiber Coil Turntable is an essential tool for Managing Loose Fiber Coils for Trouble-free Rapid Deployment. This versatile device can be used for loose Terminated Coils of up to 1500' with or without MST/MFTs attached.

The Turntable also works great with spooled Fiber Cable on reels, CAT 5/6 cable, COAX cable, and even dispensing Pull Tape or Pull Rope. Quickly disassembles for easy storage

## Features:

- Reduces Fiber Coil Spring back
- Easily adjustable for multiple size coils
- Rubber Cleats affixed underneath to prevent slipping
- Metal Stakes included for when working in grass etc...
- Adjustable brake for increasing tension and reducing Drag & Backlash
- Handles on each corner for easy transport
- Alignment Guides for determining proper ID

*(Shown with Turntable Spindle Accessory)*

## FIBER COIL TURNTABLE INSTRUCTIONS

You will receive the parts shown with your Fiber Coil Turntable Kit.

Remove the MFT/MST tray to expose the turntable.

The turntable spinning rate can be adjusted to add more drag by adjusting the large screw.

Determine the Internal Diameter by measuring the coil.

Adjust the 4 coil stops by loosening the knobs, sliding the stops inwards or outwards and adjusting them to the proper ID by aligning the arrow on each stop to the corresponding circular diameter guide.

Lower cable onto coil stops.

For larger diameter cables, reverse the footing on the coil stops.

Reattach the MFT/MST tray by aligning the tray over the stops. The tray rides onto the cable and adds pressure to the coil as the coil is unwound.

Using the 2 Velcro® straps, secure the MFT/MST to the tray.

Remove the bindings once you are ready to unwind the coil.

\*Ground stakes are available if needed by inserting them at each corner.

# REEL DEAL CABLE CADDY

Storing, transporting, and using your cable reels and pull lines on-site is no longer a multi-step process. With the new U-TECK Reel-Deal™ Reel Caddy, you can do all of this with one simple tool.

## FEATURES:

- Constructed from 3/4" impact resistant plastic
- High visibility safety yellow
- Quick release spindle construction for easy reel loading
- Pivoting, rubber feet and wide base prevents sliding or tipping
- Compact design perfect for storage and transport
- Made in America

Made from solid 3/4" impact resistant plastic, the Reel-Deal™ can handle the everyday wear and tear all of your equipment is subjected to, and then some. The non-fading safety yellow color gives you extra visibility. Notched handle makes for easy pick-up and go!

Most reel caddy's have wheels or simple, easy to tip steel framing. The most important feature that makes the Reel-Deal™ stand out from the rest is the stout, compact design and pivoting rubber feet that allows on-the-spot security with no slipping, no tipping, even on unlevel terrain. Holds reels with a combined weight of up to 200 lbs!

Other unique features include the quick-release spindle construction for easy reel loading from either side, and the reel divider that allows each reel to move independently from the others. This allows you to pull cable from more than one reel – in opposite directions, at the same time!

Whether you do work for telecoms or CATV's, the Reel-Deal™ Reel Caddy is ready to go to work for you.

# REEL DEAL SINGLE LINE PULL CADDY

Pull tape & pull line products are used to help expedite cable installation. Also, pull tapes are often used once and discarded. But with U-TECK's Reel-Deal™, you can now easily reel out the pull line then re-spool it, allowing you to re-use it again and again. Storing, transporting and using your pull line on site just got easier and more efficient. With the new U-TECK Reel-Deal™ Single Pull Line Caddy, you can do all of this with one simple tool.

## FEATURES:

- Constructed from 3/4" impact resistant plastic
- High visibility safety yellow
- Quick release spindle construction for easy reel loading
- Pivoting, rubber feet and wide base prevents sliding or tipping
- Compact design perfect for storage and transport
- Made in America

Made from solid 3/4" impact resistant plastic, the Reel-Deal™ can handle the everyday wear and tear all of your equipment is subjected to, and then some. The non-fading safety yellow color gives you extra visibility. A notched handle makes for easy pick-up and go!

Most reel caddy's have wheels or lightweight, easy to tip steel framing. Of all the features offered by the Reel-Deal™, the most important is the stout, compact design and pivoting rubber feet that allows on-the-spot security with no slipping, no tipping, even on unlevel terrain. Another unique feature includes the quick-release spindle construction for easy pull line loading. The Reel-Deal™ holds reels of up to 200 lbs!.

Whether you do work for telecoms or CATV's, the Reel-Deal™ Single Pull Line Caddy is ready to go to work for you.

# FIBER DROP CADDY

Are you or your Techs having a difficult time walking out Fiber Drops? Are your longer drop lines difficult to manage because they tend to 'spring' back? Introducing the solution to your problems! The ALL NEW Fiber Drop Caddy!

## Features:

- Fiber coil easily attaches to caddy with just ONE carabiner (included) OR zip ties (not included).
- Can handle up to 1500' fiber drops!
- Lightweight.
- Easy to Store.
- Fits multiple coil diameters from different manufacturers.

U-TECK's Fiber Drop Caddy is designed to hold and manage Fiber Drop Hand Coils. This caddy is adjustable to accommodate various inside diameters of coils from different manufacturers. The removable spool can be easily adjusted by removing the thumb screws, sliding the (six) black spacers within the yellow spool sides to the desired location, and reinserting the thumb screws.

An empty caddy weighs 28lbs and weighs 51lbs holding a 1000' drop.

The weight keeps the caddy stable and in place while paying out fiber drop.

This caddy can also be used to pay out fiber coils, wire, or pull tape, that are already on a core with a 1.25" inside diameter and a 5.25" wide width, by using the spindle only.

ITEM DESCRIPTION:

FIBER DROP CADDY

VPN:

59016

# FIBER DROP CADDY INSTRUCTIONS

**Remove spool from caddy frame by sliding the spool assembly from the frame.**

**DO NOT remove the ties or plastic packaging until the coil is attached to the caddy and ready to use!**

**Determine the inside diameter of the fiber cable to be used.**

**12.75"DIA    14.5"DIA    16"DIA**  
**There are 3 predetermined positions to which the spool can be adjusted.**

**Slide the spacers to the desired spool diameter by removing the thumb screws and reinserting in the desired position.**

**Attach the inside of the coil to the spool by using the carabiner (included) OR tie wraps (not included).**

**Reinsert the loaded spool into the caddy frame.**

**The payout direction is indicated inside the frame.**

**U-TECK recommends positioning the caddy on a fairly level surface while in use, However the pivoting feet do allow for it to be used on some uneven surfaces.**

# FIRE RETARDANT INTERIOR BACKBOARDS

U-TECK manufactures a full line of Fire Retardant Backboards for Telecom and Datacom Equipment Installations. Check your local building codes and requirements. These backboards make installations quick and uncomplicated for technicians and contractors on the move and come ready for interior or exterior applications!

**Comes in White or Gray / Low Maintenance / Moisture and Termite Proof / ASTM Certified / UV Stable / No Splitting or Cracking**

Our backboards are constructed of ¾" AC grade interior plywood purchased from sustainable forest wood manufacturers. They have 4 pre-drilled mounting holes, are sanded and then painted with gray or white fire retardant intumescent paint. The board is Class "A" rated per ASTM E84 (testing documentation available upon request). Our finished backboards are of the finest quality, and we have supplied backboards without any safety concerns or complaints regarding quality and reliability.

By specifying U-TECK Backboards, you can be sure you will uphold the quality and safety standards of your company while meeting today's construction guidelines.

Offering the highest quality products available is always our top priority. This objective was never taken more seriously than when we were approached to produce a fire-retardant backboard for use with telecommunication equipment. While other manufactures offer products using just the paint testing to prove fire retardancy, we aimed for a Class "A" rating for the entire backboard! We submit random backboards to an outside testing lab to continuously test our finished units using the Steiner tunnel test. This test is conducted in accordance with the ASTM International fire-test response standard E84, to ensure our finished products can be labeled as Class "A" rated, the highest rating available within that ASTM specification. Every U-TECK Fire-Retardant Backboard comes with this Class "A" rating, along with the Class Rating Label affixed to each board! That makes ours the safest backboards available in the market today! Custom Colors are available!

# EXTERIOR BACKBOARDS

## Backboard Specification

U-TECK recognizes the need for long-lasting material construction when choosing a backboard for outdoor use. Nature itself can be a brutal force, with outdoor backboards being exposed to fluctuating temperatures, rain, wind, and hours of direct sunlight. When you choose an outdoor backboard, choose one that will outlast standard wood backboards for years of low maintenance use.

### FEATURES:

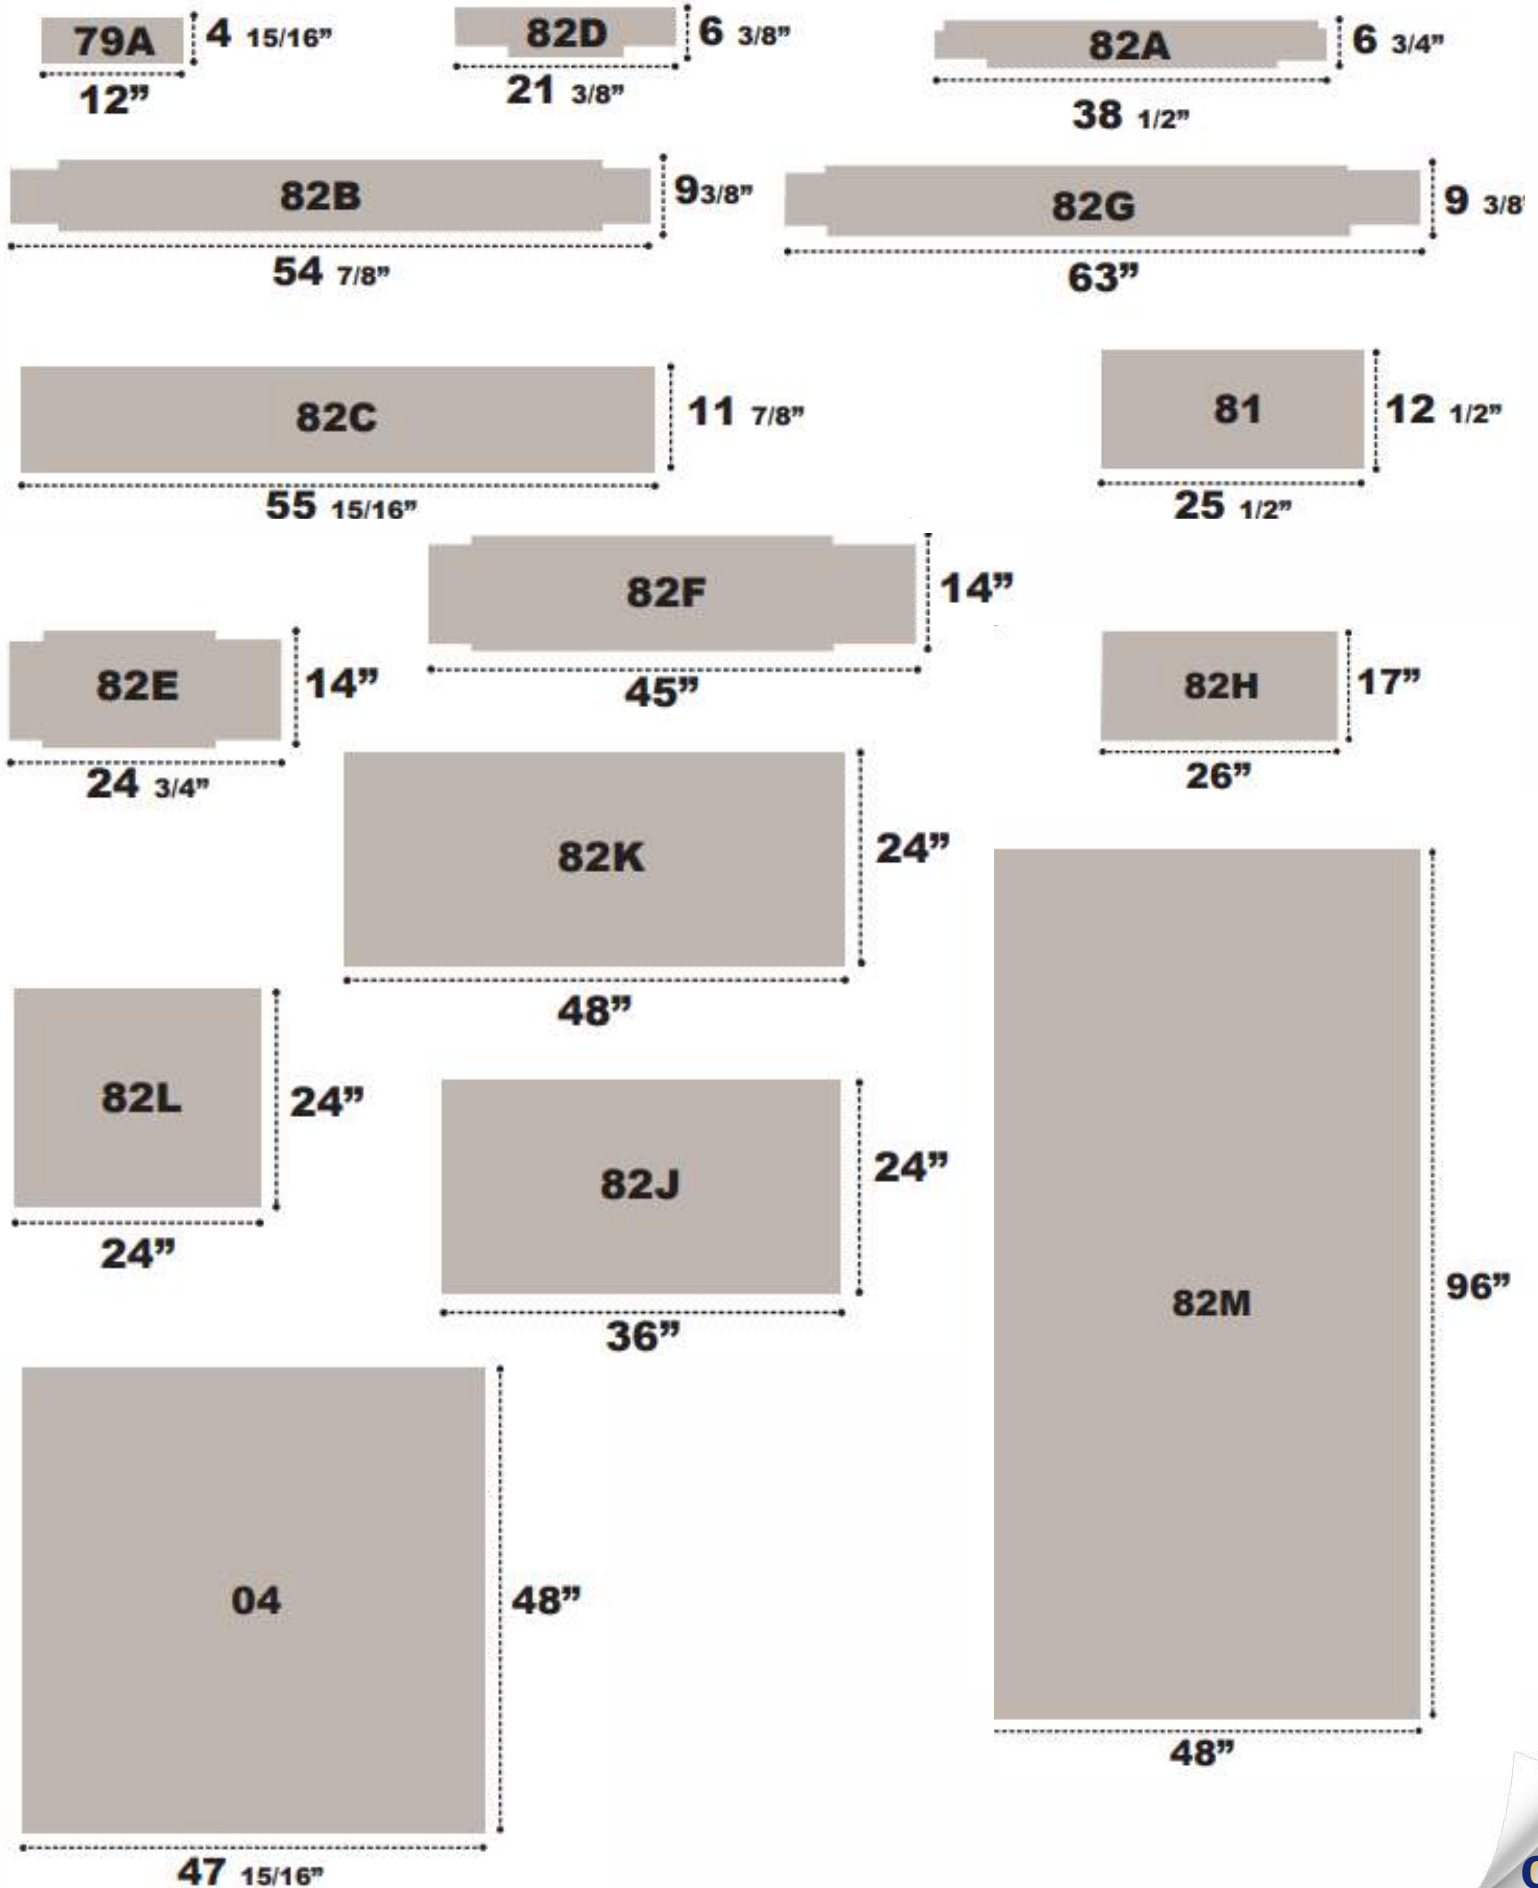

- Constructed from 3/4" impact resistant plastic
- Paintable and ready to install
- Low maintenance
- Moisture and termite proof
- A size for every job
- No grain raise or knots
- No splitting or cracking
- UV stable
- Meets UL94 5V, UL 1975 and has a flame spread of 20 according to ASTM E84

Made from 3/4" impact resistant plastic, our Exterior Backboards are super tough and moisture proof. Available in any size configuration, this backboard will never rot, split or crack, yet can be drilled and painted like wood. It is perfect for any outdoor mounting use, including on cell towers to mount communication and power equipment.

Why mount your equipment to backboards that will need to be replaced due to constant weather exposure? Choosing the right tool for the job guarantees you'll save your company time and money.

Ped Pedal Tent 5' x 5'	39022-2	60" x 60" x 72" work space

# VENT TENT

U-TECK has developed the Vent-Tent, a portable shelter with more safety features than any other manufacturer currently has available in today's market

## Features:

- Quick and easy set-up
- Many safety features
- Lightweight & compact
- Full circulation
- Non-corrosive hardware
- Reflective sides
- No preshrinking
- Will not mildew
- 10" Blower Port in back

The Vent-Tent is specially designed to safeguard the craft person from fatal carbon monoxide build-up. The standard features that U-TECK installed allow air to be fully circulated by the following methods:

- Three of the sides have a lower-level vent, which allows for up to 18 inches of opening for air circulation at ground level.
- Two of the sides have a window, which may also be opened for upper-level air circulation.
- The combination of open lower-level vents and open windows allows for cross-ventilation, which eliminates the possibility of fatal carbon monoxide build-up.

U-TECK has also installed a "sock" in the back of the Vent-Tent to allow for a ventilator hose, blower, or heater-blower combination to be hooked up.

In addition to carbon monoxide protection, the Vent-Tent, with its roll-up bottom and side windows, is excellent on hot, rainy day

SPECIFICATIONS - 6' x 6' FOOTPRINT

# PED MAT

U-TECK has developed a herbicide-free alternative to control unwanted vegetation around pedestals. The solution is now known as WeedEnder™ Ped-Mat.

Comprised of a dense, multi-directional needling of specially formulated synthetic polyester fibers, the material is additionally impregnated with a special resin with ultraviolet inhibitors and fire resistant properties. Constructed from 100% recycled material, WeedEnder™ increases visibility, decreases herbicide use and site maintenance, and proves to be extremely durable.

## FEATURES:

- Fire-retardant
- Long-lasting 15 year warranty
- Improved visibility, reduces damage
- Easy to install
- Made from Recycled Plastic
- No Runoff
- No herbicides

While Ped-Mats increase visibility around your pedestals, it is also great for public relations by eliminating unsightly overgrown grass around pedestals or other fixtures on or next to someone's manicured lawn. You get all of these benefits without the burden of weed-eating or unsightly herbicide use.

WeedEnder™ is also available in rolls for a larger coverage area. Rolls can be from 1 ft to 8 ft wide, and up to 250 foot length. Installation is simple. Determine the size of the pedestal and cut the Ped-Mat along the appropriate perforated lines and stake in place.

*Before & After Ped Mat Installation*

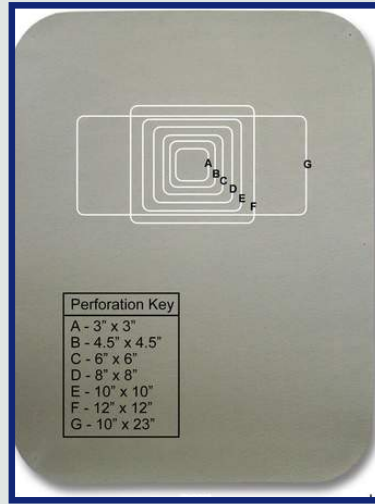

# PED MAT SPECS

Ped-Mat 1 is die-cut and perforated to fit around most round pedestals.

Ped-Mat 2 is die-cut and perforated to fit around most square or rectangular pedestals.

Ped-Mat 3 is not die-cut and fits in those hard-to-fit areas, such as next to poles, other pedestals, or other obstructions. You cut to fit.

WeedEnde<sup>TM</sup> Rolls: Available in 3' and 6' Width X 25' length. Longer rolls are available.

Joining Strip is a 4" x 25' strip to join (splice) the WeedEnde<sup>TM</sup> rolls.

Hardened Steel General Purpose Spiral Spikes are 6" long and are designed to hold the mat in place. Packed 100/Box.

316 Stainless Steel Staples measure 1 1/4" x 5/8" and are packed 2,000 per box. These are used to join two widths of WeedEnde<sup>TM</sup> material with the joining strip.

Manual Staple Gun holds 150 stainless steel staples and is pre-set to allow staple penetration through the material for splices and repairs.

Adhesive/Caulk is specially formulated for primerless adhesion to the WeedEnde material and the metal or wooden guardrail posts (in wet or dry conditions) to inhibit weed growth.

# UTILITY POLE MAT KIT

Maintenance crew members have thousands of miles of utility lines to cover in order to maintain all non-exempt equipment. For example, one utility company states that maintenance crews are responsible for inspecting and removing flammable material within a 12' foot radius around approximately 120,000 poles and transmission structures in State Responsibility Areas. These numbers continue to increase every year as more and more people move to rural areas and new power lines are added to support new communities. That's a lot of ground to cover!

## FEATURES:

- Fire-Retardant
- Prevents Vegetation Growth
- 15 Year Warranty
- Easy to Maintain
- No Herbicides
- Easily Cut To Fit Any Area

So, how do you handle the ground level vegetation? Herbicides? Lawn mowers? Weed-whackers? Raking? All of the above?

There is an easier way! We've created the WeedEnd® Utility Pole Mat, a fire-retardant mat that provides vegetation control within a 12' radius around the pole.

A mat so strong and durable that it carries a 15 year warranty!

# LIGHT INDUSTRIAL & UTILITY VENTILATOR

For a versatile portable ventilator with just the right amount of power, the VAF-1500 or 1500-230 (blower /extractor) is ideally suited for light industrial or utility applications. Perfect workhorses for small confined spaces such as manholes or sewers, these compact blowers deliver maximum airflow for a safe, comfortable, and controlled work environment. Your construction, utility, or telephone crews can depend on the UAF-1500 or 1500-230 to deliver a continuous flow of fresh air to blow and extract toxic or noxious gases.

## FEATURES:

- CFM rating of 877
- Lightweight, only 18 lbs. (8.2kg)
- Stackable to save storage or work area space
- Capability to connect up to 50 feet of straight duct
- Ideal for manhole applications
- UL & CUL listed

## INDUSTRIAL HIGH CAPACITY VENTILATOR

For confined spaces that require a power house air ventilator, the UT-VAF-3000A can handle your most demanding industrial needs. With a forceful 1 H.P. motor, the UT-VAF-3000A can deliver both positive and negative airflow at an incredible maximum capacity of 2,091 CFM in the most difficult work environments. No matter what your industry or application-construction, demolition, utility, paper mill, shipyard, power station, tank purging, or manufacturing-the UT-VAF-3000A is designed to take on the toughest of jobs.

## FEATURES:

- CFM rating of 2796 (59.2 m3)
- Weighs on 32.5 pounds (14.74kg)
- Stackable to save storage or work area space
- Powerful 1Hp electric motor (.75 kW) capability
- Ideal for confined spaces that need greater airflow
- This model is available with an American 3-prong plug or with the European Shuko plug.

# PNEUMATIC VENTILATOR

For confined spaces that require a powerful ventilator that meets strict hazardous space standards, the UT-VAF-3000P delivers high-performance with uncompromising safety. With a forceful 1.5hp motor, the UAF-3000P can deliver both positive and negative airflow at an incredible maximum capacity of 2,063 CFM in the most difficult work environments.

## FEATURES:

- CFM rating of 2,063 (58.4 m3)
- Weights only 28 pounds (12.7 Kg)
- Stackable to save storage or work space area
- Powerful 1.5 Hp pneumatic motor
- Capability to connect up to 125 feet (38 m) of straight duct
- Redirect stale compressed air away from the main air stream
- UL and C-UL listed for use in Class I, Groups A, B, C and D; Class II, Groups E, F and G; and Class III Hazardous locations

## HIGH CAPACITY VENTILATOR

Designed for use in areas that require a greater exchange of air, the UAF-8000A promises performance. Equipped with a powerful 5hp motor, the UAF-8000A generates both positive and negative airflow at an outstanding maximum capacity of 9,968 CFM. Hold onto your seat, this 20.5 inch unit outperforms ventilators three or four times its size!

## FEATURES:

- CFM rating of 9,986
- Weighs 119 pounds
- Powerful 5Hp electric motor
- Two built-in handles
- Dual-wall shell design
- Ideal for larger areas that require greater airflow

# VENTILATOR ACCESSORIES

**DUCT WITH QUICK CONNECT** - Available in 25 or 15 foot sizes for any model. Our duct hoses are made of flexible, light duty, vinyl, woven polyester. Ducts are easily retractable and designed to handle large volumes of air at relatively low pressure. The ducts are flame retardant and easily connect to fan lips for positive and/or negative airflow. Model 1225-SC duct is dipped in static conductive material for safe use in hazardous environments.

# STREET SAVER & STREET SAVER SLIM

U-TECK's New "Street Saver" and "Street Saver Slim" Micro-Trench Protectors gives Fiber Optic Contractors added protection on their Saw Cuts, keeping the trench open and preventing breakage, prior to back filling. Using the Micro-Trench Protector results in a much cleaner looking finished product.

## Features:

- Helps Prevent Edge Breakage Prior to Back Filling
- Two lengths available - 4' and 8'
- 3/4" 'fins' keep the product in place
- Street Savers Interlocked for Extended Coverage
- Sloped Edges on each side for Easy In & Out
- Constructed from HDPE - will not Break or Crack
- UV stable
- Results in a Cleaner Looking Finished Product

Two lengths and widths are available to assist in complete trench coverage, and linking The "Street Savers" together is simple using our interlocking design, which also allows for flexibility when micro-trenches are cut along curves.

For higher speed traffic or overnight construction, there are 6 holes which can be used for temporally screwing or bolting the Street Savers into place.

The "Street Saver" is Constructed from High Density Poly Ethylene (HDPE), will not break or crack under heavy traffic and are UV Stable. The Hi-Vis HDPE ensures increased motorist awareness to the construction zone. The Sloped Edges ensure ease for Ingress and Egress.

The "Street Savers" were designed to stay in place by utilizing the 3/4" fins located underneath the product. These fins sit into the Micro Trench, ensuring the Micro-Trench Protectors will stay firmly in place.

# MICRO-TRENCH TAMPER TOOL

The increase in fiber deployment initiatives have created the need for more cost effective ways of managing the task of fiber installation. Micro-trenching is one such solution

## FEATURES:

- 14" long, 3/4" wide tamping end
- Tamping end constructed from 100% recycled solid plastic
- Welded, forged steel handle attachment
- Designed for quick and easy use

Micro-trenches are low impact slot cuts into roads, sidewalks, etc, in which fiber is placed. This method offers quick and easy install, clean-up and surface repair, especially in urban areas. Although the widths and depths of these trenches vary based on local municipality specifications, the most common dimensions of the trenches are at least 1" wide, and up to 12" deep.

One challenge faced when placing fiber into these trenches is making sure the fiber is laying at the bottom of the entire trench in order to avoid potential future damage by road re-surfacing or other maintenance activities on the surface above. We've created a quick and easy tool that will ensure that your fiber is tucked neatly at the bottom of the trench and out of harms way. The 3/4" thick, 14" long tamper fits easily into the slot-cut, and, with it's curved end design, fits snug to the fiber cable without pinching or cutting. The tamper end is made from 100% recycled plastics fitted over welded forged steel. The straight 48" hardwood handle makes it easy to use and quick to tuck away in the back of your truck.

Please call the U-TECK Customer Service department now to order this unique Micro-Trenching Tamper Tool!

# UNIVERSAL LADDER WEDGE

Years ago, U-TECK combined a longtime, craft-accepted wooden ladder wedge design with polyethylene material to produce a rugged ladder wedge that can be warranted for up to five years. Using this material prevented paint scrapes and gouges by doing away with wood, and painting, all together; the color is molded throughout the polyethylene wedge. In reviewing this popular standard in ladder leveling, we found that the ladders most often used today by OSP personnel have transitioned to ladders with wider feet. Because of this research, we've increased the footprint size to each ladder wedge tier to accept up to 6-1/2" wide ladder feet. The "Universal" ladder wedge has all the same great features and load capacity as the original, but has now become much more versatile.

## Features:

- Supports ladders with feet up to 6.5" wide
- Prevent Accidents
- Available in Safety Yellow and High Visibility Orange
- Positive Footing
- Extremely Rugged
- Anti-Skid
- Adjustable
- Metal or Rubber Cleats

The Ladder Wedge is used when a ladder must be put against a building, cable, or pole, and one leg does not touch the ground firmly, thus creating an unsafe climbing condition. The Ladder Wedge is placed under the unlevel foot to make the ladder steady.

The U-TECK Ladder Wedge is also needed on soft ground to prevent earth movement, which can cause the ladder foot to move while the user is climbing.

The Ladder Wedge was put through rigorous testing by an outside testing facility. Their material analysis report concluded that no visible evidence of any deformation or failure of the wedge was noted at our specified 375 lb. minimum load or at their standard 396 lb. load test stop point.

# RUNG RUNNER LADDER CADDY

U-TECK introduces the Rung Runner™, the easiest way to carry and transport heavy extension ladders from vehicle to job site. Using a universal tether, you can now carry any type of ladder, including large extension ladders with solid rails.

## Features:

- Can be used with any style of ladder
- Reduces worker fatigue
- Helps prevent back strains and injury
- Decreases property damage
- Increases single-worker productivity
- Fast and easy assembly with most ladders
- Off-sets ladder weight for safer single-worker use

The Rung Runner™ has a unique design that enables it to cradle any type of extension ladders on their side, reducing the ladder weight by as much as 90%. This is the easiest and most stable way to carry them.

Using the new Rung Runner™, worker fatigue is virtually eliminated, off-setting the weight of the ladder, making it lighter and more easily maneuverable into tight spots such as parking lots, construction sites, and into gated fences.

Worker productivity is increased because of the ease of getting ladders to and from the work site more quickly.

The framework is constructed of lightweight polymer and stainless steel, making U-TECK's Rung Runner™ extremely tough and durable.

# STEP RUNNER LADDER CADDY

U-TECK introduces the Step Runner™ Step Ladder Caddy, the easiest way to carry and transport heavy step ladders from vehicle to job site. Using a universal tether, you can now carry any type of step ladder.

## Features:

- Can be used with any style step ladder
- Reduces worker fatigue
- Helps prevent back strains and injury
- Decreases property damage
- Increases single-worker productivity
- Fast and easy assembly
- Worry-free tires (easy to maintain)
- Off-sets ladder weight for safer single-worker use

The Step Runner™ has a unique design that enables it to cradle any type of step ladders on their side, reducing the ladder weight by as much as 90%. This is the easiest and most stable way to carry them.

Using the new Step Runner™, worker fatigue is virtually eliminated, off-setting the weight of the ladder, making it lighter and more easily maneuverable into tight spots such as parking lots, construction sites, and into gated fences.

Worker productivity is increased because of the ease of getting ladders to and from the work site more quickly, while being able to carry additional tools and equipment at the same time.

The framework is constructed of lightweight polymer and stainless steel, making U-TECK's Step Runner™ extremely tough and durable

# POLE MOUNTED LADDER BRACKETS

U-TECK's Pole Mounted Ladder Bracket line is used in conditions where Distribution Cabinets, UPS Cabinets and other equipment is mounted onto utility poles and where technicians are using ladders to access them. Too often the angle of the ladder is positioned under the cabinets creating an unsafe angle for the worker to stand, open the cabinet, and perform routine functions

## Features:

- Provides Correct Ladder Positioning for Techs
- Permanently attaches to poles under Cabinets
- Attachment point for Safety Harness
- Powder Coated Steel and Stainless Hardware

U-TECK's Pole Mounted Ladder Bracket line is used in conditions where Distribution Cabinets, UPS Cabinets and other equipment is mounted onto utility poles and where technicians are using ladders to access them. Too often the angle of the ladder is positioned under the cabinets creating an unsafe angle for the worker to stand, open the cabinet, and perform routine functions.

Our Pole Mounted Ladder Bracket puts an end to that unsafe condition. Our Brackets are permanently mounted under the cabinet and adjusted to the correct depth of the cabinet. Once installed, and the ladder deployed, the cabinet can be safely opened, and work performed, providing a safe and comfortable angle to work. These Brackets can be adjusted from 21" to 27" away from the pole using 2 stainless steel through bolts. Brackets are mounted to the pole using thru-bolts (not provided). Currently available in 3 colors.

U-TECK also offers a "fixed depth" ladder bracket. This bracket comes in 18", 21" and 24". This ladder bracket has all the same features but it cannot be adjusted away from the pole. This in turn offers a more economical choice if you don't need the extra function.

\*Pole Attachment Hardware Not Included

# 5G / CRAN LADDER BRACKETS

U-TECK's CRAN Ladder Bracket was built for 5G Deployment! This custom designed Ladder Bracket Provides a Safe and Sturdy Ladder Rest onto Urban Utility Poles where Centralized Radio Access Networks (CRAN) and Other Equipment are Mounted.

## Features:

- Provides Correct Ladder Positioning for Techs
- Permanently attaches to poles beneath C-RAN's
- Attachment point for Safety Harness
- Powder Coated Steel and Stainless Hardware

Using the CRAN & 5G Pole Mounted Ladder Bracket means that there isn't a need for Bucket Trucks to be Dispatched for Routine Maintenance or for Quick Tasks thus Saving Time, Money, and Resources. CRAN Ladder Brackets are Permanently Mounted Beneath the Node Cabinet. Once installed, and the Ladder Correctly Deployed, the Node Cabinet can be Safely Opened, and Work Performed, providing a Safe and Comfortable Angle to Work.

# TEMPORARY FIBER DROP MARKERS

When new communication services are installed at a location, often a temporary cable is placed on the ground and left until such time as a crew can come and permanently bury the cable in the ground.

## Features:

- Quick, easy, light weight
- 2.5" in diameter
- Highly visible fluorescent orange acrylic material
- Protects expensive cable drops prior to trenching
- Reusable

This leaves the cable vulnerable from damage caused by vehicle traffic, mowers and people tripping on the cable, not aware of its presence. U-TECK has developed a temporary solution to this problem. Our markers are made from a Highly Visible Fluorescent Orange Acrylic material that enhances the visibility of the cable and helps reduce damage that might occur.

Each marker is 2.5" in diameter. Simply insert the staple pin onto the marker disc with the message side up, straddle the cable with the marker, and push firmly into the ground. The arrow indicator should align with the direction of the cable. Space markers adequately for best results.

U-TECK's Temporary Fiber Drop Markers are meant to be reused. *Fully customizable with your Logo and company colors!*

# CABLE & WIRE STORAGE BOX

**NEWLY REVISED!!** U-TECK has come up with a practical solution to the problem of storing and transporting drop wire, station wire, and aerial drop wire shipping boxes. Usually, these shipping boxes are out in the weather, getting wet, and disintegrating, making it more difficult to use them as they were intended. Also, theft of copper wire has become an ever increasing problem.

## FEATURES:

- Constructed from rustproof high density plastic
- Keeps contents dry in harsh conditions
- Measures 37" wide x 21" deep x 20" high
- Recessed soft grip handles
- Theft resistant key lock with 2 keys
- Fits all cable boxes you are using.
- Three Cable Guides for easy payout
- Storage tray for loose tools or connectors
- Measurement guide on the top surface
- Made in the USA!

U-TECK has developed a Cable and Wire Storage Box that fits neatly in the back of service trucks and vans, keeping these boxes of wire and cable dry, safe and secure.

Additionally, there are three cable guides on the front of the storage box so cable can be pulled from the inner boxes without having to unlock it. Each box is made from tough, high density, structural plastic, which will withstand the harshest elements.

With a soft-feel, recessed handle on each end and a keyed lock your cable, wire, and other contents are going to remain safe and ready when you need them.

# BUCKET HEATER

The Bucket Heater was designed with special features needed for use in elevated buckets.

## FEATURES:

- Solid Steel Construction
- Power 800w Reduced to 300w
- Inrush 13 Amps Reduced to 3 Amps
- BTU: 5200
- Voltage: 110 - 120
- Size: 6" x 5" x 5"
- Weather Resistant

A front louver face panel protects the heating element from being damaged by wire cuttings, tools, etc., while protecting the user from coming into contact with heating surface. The cord and heavy duty metal cabinet remain cool during long periods of operation. The Bucket Heater promotes safety first with waterproof cord grommets and rubber covered switch handles, no dangerous flames, no combustible fuel or burning coils. The heaters have an optional electric shut off if tipped in any direction, making these the safest heating units available for any work area. Three prong electric plug and heavy duty cord meet OSHA standards for this type of heater.

# BIG BUDDY HEATER

This patented radiant 4,000-18,000 BTU Liquid Propane heater is the perfect solution for heating up to 450 sq. ft. An integrated fan increases the heating capacity of this unit, blending radiant and convection style heat to give you the best of both worlds.

## FEATURES:

- Ideal for use in the Vent Tent
- 4,000, 9,000, or 18,000 BTU per hour
- For use with propane gas
- Heats up to 450 sq. ft.
- Single control start knob
- Hi-Med-Low heat settings
- Swivel regulators
- Automatic low oxygen shut-off system (ODS)
- Accidental tip-over safety shut-off
- Connects to a 20 lb. cylinder with optional hose
- Fan operates on 4 D batteries

Two internal swivel regulators give you the ability to adapt usage from disposable cylinders to a remote gas supply with the purchase of a single hose and filter. (see below) To light the unit, simply push and rotate the knob. The built in Piezo sparking mechanism will take care of the rest. With the Oxygen Depletion Sensor (ODS) and accidental tip-over safety shut-off, you can be sure that you will enjoy years of comfortable outdoor safe heat.

# DIELECTRIC UMBRELLA

U-TECK's line of dielectrically safe fiberglass umbrellas provides a variety of options for protection from the elements, rain or shine.

## Features:

- High-visibility, heavy duty yellow umbrella with top air vents
- Fiberglass extension pole and skeleton
- Comes complete with adjustable tripod
- Offered with straight pole or with our exclusive Sturdy-Tilt locking hinge

Our exclusive Sturdy-Tilt option with locking hinge allows the user to adjust the angle of cover for shade from damaging ultraviolet rays or from driving rain. We've also moved the tilt higher up the pole, to off-set the weight, making the umbrella more sturdy

The optional window in the covering of the umbrella incorporates a piece of transparent plastic, which allows the worker to see obstacles or hazards that may be above the umbrella.

Each umbrella is constructed of materials that make it durable enough for use in high winds or harsh weather yet light enough to be used on mowers, tractors, etc.

For safety, our umbrellas have a hardened fiberglass composite extension pole so that no metal-to-metal contact can be made. The Dielectric Umbrella comes standard with an adjustable tripod stand with three anchor stakes.

## Ordering Information

# WORK UMBRELLA

U-TECK's line of umbrellas provides an economical method of protection from the elements, rain or shine. Unique tilt-top feature allows user to shade themselves from ultraviolet sun rays any hour of the day.

## Features:

- Heavy-duty construction
- Reinforced vinyl canopy
- 3-position tilt optional
- Optional carrying case
- Aluminum/hardwood poles
- Pointed poles for easy set-up

Strong enough yet light enough to be used on mowers, tractors, etc.

For safety purposes, our umbrellas have a hardwood extension pole so no metal-to-metal contact with underground utilities can be made.

Our carrying bags are also unique in that each one has a separate pocket for the umbrella extension. This eliminates damage due to improper insertion of the umbrella.

We also offer two additional accessories as options for securing your work umbrella, the suction mount and the adjustable tripod stand. Both give you more freedom when placing your umbrella on the job, whether you are working next to cabinets or on hard surfaces.

Suction Mount

Adjustable Tripod Stand

# BURIED CLOSURE PROTECTIVE HOUSING

The Safe Way to Protect Your Pressurized Closures from Ghost Leaks and your Filled Closures from Damage! Pressurized Closure: The buried closure protective housing (closure coffin) is designed to protect your pressurized closure from the weight of the back-fill, as well as from the added weight of vehicles that run over the splice location causing costly "Ghost Leaks".

## FEATURES:

- Simple to install
- No special tools required
- Durable
- Convenient
- Few piece parts
- Re-enterable
- Chemical-resistant
- Cost-effective
- High-impact plastic
- Environmentally safe

All pressure crews are very familiar with this problem: The weight of the dirt and road vibrations can cause the closure to become disfigured around the end plate, causing a small leak to occur.

When the dirt is removed the closure recovers and the leak goes away. This is why it is called a ghost leak. Also, if cables are not secured and protected where they entered a drilled plate, a ghost leak might occur. The Buried Closure Protective Housing can eliminate this.

Non-Pressurized: Even here, the closure can suffer damage from the weight of the dirt. We have come to realize that the re-enterable compounds do not provide the strength needed to withstand the weight. The Closure Coffin does. Also, in rocky areas, the sharp rocks can penetrate and deform many closures, allowing water to enter or causing damage from compression. Before the development of the Buried Closure Protective Housing, companies were using creosote- covered boards or other treated lumber, which decays, and sand or split pipe, which requires an excessive amount of labor.

Now, with the Buried Closure Protective Housing, you have a uniform method to assure your company that the closure will be protected for the life of the cable.

# SEALGUARD II KIT

## FEATURES:

- Designed for high inflows in precast or brick-lined structures
- Stops leaks of up to 50 GPM
- Can be injected into flowing water with a reaction time of 3 seconds
- Dual-component polyurethane grout
- Permanent fix
- 45 PSI compressive strength
- Each set of grout contains one cubic foot of cured material that will not shrink

## Repair Options

- Excavate and replace? – Very Expensive
- Reline with cements or elastomers? – Expensive, and the problem area must be dry
- Grout with cements? – Nothing more than a temporary patch
- Repair with chemical grouts? – Will wash out if the flow rate exceeds 1 to 2 GPM

None of these options will stop leaks of up to 50 GPM in seconds!

One manhole leaking 5 GPM will leak 7,200 gallons per day! If the cost of treating wastewater is \$1.70 per thousand gallons, then this single manhole with a 5 GPM leak costs \$4,467 per year. That is \$4,467 per year forever.

The savings in wastewater treatment fees in the first year for a single manhole with a minor leak is over \$4,000.

## **A SealGuard II Kit contains:**

- Twelve sets of dual-component polyurethane grout
- Twelve static mixers
- Dual-component heavy-duty caulk gun
- Safety goggles
- Two pairs of chemical gloves
- Safety clothing
- Instruction sheet
- MSDS sheet
- Convenient waterproof carrying case
- Top-notch support from SealGuard technicians

## **SealGuard II stretches your repair dollars!**

- Each component can be reordered separately
- Larger quantities available (full and half pallets)

## **SealGuard II requires only these tools:**

- Hammer drill; 5/8" masonry bit; Hammer; Flat-tip screwdriver; Knife; Putty knife;
- Rags, oakum or burlap

## **SealGuard II cleans up easily!**

- Snap mixers (15 minutes after injection) with a sharp downward motion.
- Use a putty knife to scrape excess material from concrete.
- Dispose of waste foam with ordinary wood or plastic waste.

## **From This**

## **To This!**

**In JUST 30 SECONDS!**

# ATTIC-TRAX™ ILLUMINATED WALKBOARDS

Attic-Trax™ Illuminated Walkboards are used to assist techs in traversing safely through an attic space while performing functions such as wiring, inspections, equipment installations, pest control, etc.

Composed of a lightweight polymer, they are lightweight yet sturdy, and easy to maneuver. Each unit includes a convenient shoulder strap to enable 3 points of contact to be maintained while ascending and descending attics, stairwells and more.

Our proprietary Attic-Trax™ Illuminated have a rechargeable panel light attached to the underside, allowing the walk boards to be illuminated in dark spaces.

## Features:

- 500 lb. load rating
- Adjustable Brightness
- Made from lightweight polymer
- Service temperature range: -40F to 180F
- Works in attics with 16" or 24" OC joist spacing
- Two 18" x 26" work surfaces per set
- High Visibility handles
- Non-Slip Surface
- Long Lasting Battery Life (see p.2)
- Traction studs at all 4 corners
- 3100mAh capacity battery
- Comes with TYPE C charging port
- Shoulder Strap included with all ATI purchases.

Low light conditions and power outages in the workplace increase health and safety hazards, and doing your upmost to eradicate the problems that may arise can save you and your employees a lot of hardship. The Attic-Trax Illuminated™ come with a chargeable battery affixed underneath, that provides light when turned on.

*PICTURES SHOWN SHOT AT 50% BRIGHTNESS*

ATTIC-TRAX™ ILLUMINATED  
WALKBOARD KIT (2) 18" X 26"

PRODUCT #:

62028-L

WEIGHT:

7LBS EA.  
14LB SET

# Great for Telecom, Electricians, HVAC, Pest Control, Plumbers, Contractors, Home Inspectors and MORE!

Warm and Cold Bi-color temperature and 10%-100% brightness are adjustable.

The lights can easily be removed with a single small thumb screw and recharged from the vehicle or office with the included charging cable. The lights can be brightened or dimmed.

The diamond-plate surface provides a non-slip surface, while traction studs are installed at all 4 corners as an additional Anti-Slip measure.

The intensity of the light can be adjusted. Brightness level does effect battery life as follows:

-  100% BRIGHTNESS - 2.5 HR BATTERY LIFE
-  75% BRIGHTNESS - 3.5 HR BATTERY LIFE
-  50% BRIGHTNESS - 5 HR BATTERY LIFE
-  25% BRIGHTNESS - 6 HR BATTERY LIFE
-  10% BRIGHTNESS - 9.5 HR BATTERY LIFE

Charging time may vary between 1-2hrs  
\*Charger type will effect charging time

# SAFE-T LID & VERSA LID

Designed with complete safety in mind, U-TECK's Safe-T Lid Temporary Covers provide fall-in protection while you perform various functions with a manhole or handhole lid removed. Our Safe-T Lids are lightweight, yet very strong. Constructed from environmentally stabilized, high impact resistant polyethylene, it is strong enough to support over 300 lbs. of direct weight

## Features:

- Available for use with Manholes or Handholes
- Made from high impact resistant polyethylene
- Environmentally stabilized to resist fading
- Lightweight and easily stored
- Custom sizes available

Featured on both the manhole and handhole temporary covers are openings along the edge large enough to accommodate cables that extend out of the hole, and two hand openings for easy transport, placement and removal.

Often splicing crews working inside splicing trailers beside a manhole need to provide additional fall-in protection from the public as well as the crew members themselves. Additionally, both types of Safe-T Lids Covers are also a great accessory for Utility Locators, who often must connect their equipment to the cables located in an existing man or hand hole while often leaving it unattended and unprotected.

The Safe-T Lid Temporary Cover for manholes can also be ordered with a transmitter hook. This allows the transmitter to be placed under the Safe-T Lid, reducing the possibility of damage or theft when the locator isn't looking. We offer various sizes of Safe-T Lid Temporary Covers to fit the following manhole sizes: 24", 28", 32", 36", and 38". The Safe-T Lid Temporary Covers for Handholes are available to fit the two most common handhole sizes: 24" x 36" and 30" x 48". Don't see a size to meet your requirement? Contact our Customer Service to get a custom quote.

# CHAIN HOIST

This hoist is economical and designed for years of trouble-free use, with pulling applications ranging from 3/4 ton to 3 ton capacity. The lift ranges available are: 5' and 10' lift lengths

## FEATURES:

- Simple design makes routine inspection and maintenance easy
- Steel construction with a rugged one-piece cast handle
- Freewheeling feature without load makes for quick load attachment
- Safety hooks swivel 360 degrees for easy rigging
- Induction hardened grade 80 load chain

This hoist is easy-to-use with it's one-piece cast handle and includes a completely enclosed Weston type automatic brake system for precise load spotting.

The chain is heat treated and hardened grade 80 load. The simple design makes routine inspection and maintenance easy and a freewheeling feature without load makes for quick load attachment.

The permanently lubricated gears and drop forged, swivel 360 degree, safety hooks make for easier rigging. Complies with OSHA standards and is ISO 9001 certified.

# HANDI HOIST

U-TECK introduces the Handi-Hoist™, the easiest way to remove and replace heavy UPS batteries from aerial cabinets. The Handi-Hoist™ was designed to assist field technicians in the routine task of removing and replacing heavy UPS batteries that are often located in aerial cabinets. Traditionally this job was performed by dangerously overloading the lifting capacity of bucket trucks or were simply carried up and down ladders. Most aerial lifts or bucket trucks have a lifting capacity of just 300 lbs. When you add an average worker and a set of tools, there's not much left for heavy items. Both methods are very unsafe and often the result could be personal injury or property damage.

## FEATURES:

- Attaches to any Wood, Composite, or Concrete Utility Poles
- Dual Safety Straps are quick and easy to lock down
- Non-Slip Rubber Pole Brackets are Universally Designed
- Payload Cannot Free Fall
- Rated lifting capacity of 175 lbs.
- Height lifting capacity of 30 feet
- Helps prevent personal injury
- Helps prevent property damage
- Folds for easy transport and storage
- Battery Sling and Cradle Included

U-TECK's Handi-Hoist™ is also very useful when installing Small Cell, or DAS Sites, installing Video Cameras, Traffic Cameras, Emergency Warning Sirens, Aerial Cabinets, etc. U-TECK designed a unique aerial hoist that is easily mounted onto a utility pole using 2, heavy duty, permanently attached, cinching straps. The rubber mounting brackets attached to the hoist frame have been designed using the profile specifications of many of the most commonly used utility poles. They are also capable of supporting the load in all kinds of weather conditions.

When choosing the proper winch mechanism for the Handi-Hoist™, much consideration was taken to provide a reliable, fail-safe way to raise and lower a payload while keeping personnel and property on the ground safe. U-TECK selected a worm-drive winch for this product. This type of winch cannot accidentally go into "Free Spool" and cause injury or damage. The payload can only be raised and lowered using an ordinary cordless drill. When you want a payload raised, you first put the drill in forward, attach it to the 5/8" stud on the bottom of the winch and pull the trigger. When you want to lower the payload, put the drill in reverse and lower away. It's that easy!
